NATURAL SCIENCE LEADERS CONVENE IN ANNUAL SESSION

Three Thousand Delegates Assemble to Give Results of Year's Research

An innovation marking the seventysixth annual meeting of the American Association for the Advancement of Science, which began its meetings today, with delegates crowding the Pratt Building of the Massachusetts Institute of Technology and the lobbies of many Boston hotels, are the arrangements made to co-ordinate the accumulation of scientific information to be given in the 2000 papers and reports which it is estimated will have been delivered by Saturday. Three thou-sand delegates are expected and sessions will be divided into as many as 20 meetings progressing simulta-neously after today, through the re-maining sessions, to take care of the record assembly.

As the members registered today and received badges, programs and guides to Boston, at the Massachu-setts Institute of Technology, steps were already under way to collect and correlate the information in the coming reports, and to pass them on to the public in understandable terms.

FULL INFORMATION ON COAL INDUSTRY Research Bureau Questionnaire

Reveals Complete Inquiry Expected of Commission

NEW YORK, Dec. 26—Coincident with the investigation of the coal industry by President Harding's Coal Fact-Finding Commission, the research department of the Federal Council of Churches made public today the re-sults of an inquiry conducted during the last few weeks into the public attitude toward regulation of that industry. The conclusions, based on interviews and detailed replies to specific questions received from employers, labor representatives, technicians, editors, educators, and church leaders in various parts of the country are summarized as follows:

NOTABLE SCHOLARS DIRECT

CONVENTION NOW IN SESSION

CONVENTION NOW IN SESSION

Distinguished Men Serve as Officers of the American

Association for the Advancement of Science

are summarized as follows:

1. The demand for a full and authoritative statement of the facts is almost a wail. There is apparently unanimous approval of the Government's action in creating the present commission. Even persons generally well informed who have lost opportunity to read and observe, use such expressions as these: "I am in a mist of perplexity"; "There is so much doctored publicity"; "The public finds itself quite without any dependable information. quite without any dépendable informa-tion"; "No intelligent public opinion"; "Complete lack of reliable information." The editor of a great metro-politan paper which has given much space to the coal controversy omplains that "none of us has sufficient data yet on which to formulate a policy."
One of the ablest members of the
A. F. of L. executive writes, "If there
is any one thing in connection with the situation which impresses the tor at the Institute, is secretary of the committee.

Under its organization, the association has two presidents, one beardisappointing to the general public.

Full Inquiry Wanted

2. Fear is expressed lest the commission may not pursue its inquiry to the full extent of the powers given it by Congress; that, specifically, it will not secure the facts concerning investment and profits. The law obviously contemplates that the commissions vestment and profits. The law ob-viously contemplates that the commis-sion shall utilize the data in the hands of the Federal Trade Commission and the Bureau of Internal Revenue and shall supplement this as necessary by direct testimony. It is likewise apparent that if the question of the relation of civil liberties to the control of the mining industry, with particular reference to portions of Pennsylvania and West Virginia is not fully conand West Virginia, is not fully can-vassed by the commission, there will be much dissatisfaction with its find-ings of fact. The public is apparently well aware now that the crux of this whole matter in so far as the Labor controversy is concerned, is the ques-tion whether the miners are to be allowed to unionize or are to be permanently arrayed against each other in ompeting union and nonunion fields Some persons recommend the latter alternative as a matter of public policy; others see justice only in the former.

3. There is a remarkably widespread conviction that what is wrong with the ndustry goes far deeper than those natural periodic conflicts of interest over wages and hours which arbitration might adjust. It seems to be gen erally recognized that because of over-development and seasonal demand in the soft coal industry some form of Government regulation is necessary.

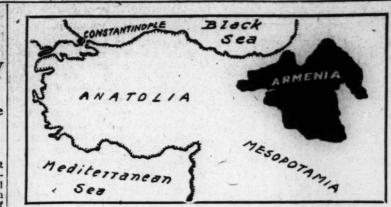

inefficiency, and that industrial progress in general demands as little federal inwording of his instruction to the the Sabatowan's departure, presided terference as possible. There has been grand jurors today showed that this over by Bishop Herbert Shipman of much talk of nationalization among the miners themselves, but official spokes-men for Labor are by no means of one mind on the subject. There is on all hands fear that the machinery of Gov-ernment control would fall under politi-cal domination. Yet the coal situation East Relief sailed with the ship to supervise the distribution of the supplies in Greece.

The bulk of the food donations so clearly constitutes an emergency that many people are thinking in terms of many people are thinking in terms of many people are thinking in terms of the many people are thinking in the many people are think the analogy of railroad regulation through the Interstate Commerce Commission has apparently impressed many people as instructive in this connection Further, it appears likely that if the threatened strike takes place spring, there will be a general demand for drastic action. "I am against na-tionalization of any industry," writes a well-known conservative editor, but

RUSSIA'S CHIEF **DECLARES VODKA** WILL NOT RETURN

President Kalinin Says He Favors License but Other Officials Oppose It

MOSCOW, Dec. 5 (Special Corre spondence) -The manufacture and sale of vodka will never be legalized in Russia so long as the Soviet Government remains in power. This categorical statement, in contradiction of the numerous reports about an impending return of vodka in Russia which have appeared in the American and European press, was made by President Kalinin of Russia in the course of an exclusive interview with The Christian Science Monitor correspondent.

Mr. Kalinin, a slight man with blue eyes and straw-colored beard, a typical peasant in dress and appearance is a well-known and popular figure in the Russian country districts, where he spends much of his time investigating conditions and making speeches. The anteroom of his office was crowded with peasants in high boots and homespun shirts, all waiting to lay their grievances and problems before their starosta, or old man, as Mr. Kalinin is habitually and affectionately called.

"I cannot imagine how these stories about the restoration of vodka have originated," he said, "for the opinion of our Government is strongly against any such course. We shall not revive the old 'drunken budget' of the Tsar, which coined money out of the de-gradation of the people by selling them poison in the shape of vodka. The abolition of vodka is one of the greatest forward steps of the Revolution; and we have not the slightest intention of retracing it.

Favor License System

"Personally I feel that our present policy of absolutely prohibiting vodka might be wisely modified in one detail. Many of our peasants have become inclined to favor a system of licenses tion. by which such men could receive a limited amount of vodka through the Commissariat for Health until they cured themselves of the habit. But the majority of my colleagues in the Government feel that to take the lead in showing her insuch a system might be open to abuse, tention to carry out as soon as posand consequently it is not likely to be sible the terms of "this great treaty

Mr. Kalinin went on to speak of the changed condition of the peasants which he had observed in his numerous trips outside the capital.

"Our peasants have suffered severely from war and hunger," he said, "and it would be an exaggeration to say that most of them are now living better than before the war. They are recovering, but the recovery is necessarily slow. At the same time there

ITALY READY TO JOIN DISARMING GROUP IF FRANCE AGREES

Washington Hears Demands to Complete Former Conference Before Calling Another

Special from Monitor Bureau WASHINGTON, Dec. 26-Failure to ratify the treaties agreed upon at the meeting of this sub-commission I pre-Arms Conference in Washington last sented objections to your plan to hear winter is being made conspicuous by the Bulgarian delegation and it was the discussion of a possible new conference, called, in part, to discuss further reduction of armaments. Why go on with a new one until the results of the former conference have been completed? is being continually asked.

In discussion of a possible new conference to discuss further reduction of armaments. Why go on with a new one until the results of the sub-commission but also to hear the Armenians. I protest energetically against these audiences.

If despite the unchangeable attitude.

completed? is being continually asked. Great Britain, the United States, and Japan have ratified; France and Italy have not. Italy says that she will ratify as soon as France does, it is stated on high authority here. Italy will wait for a decorous period after will wait for a decorous period after the official report of the conference.

France acts before giving her official standpoint and the sanction and she will not in any cirstandpoint of the Turkish delegation and the considered noncumstance act before France does.

Japan and America Agree

A dispatch from London indicates that the United States is apprehensive over a possible war with Japan and that is why there is so much talk of a new conference to discuss the question of further reduction of military equipment. This has no basis for the United States has been gratified at the attitude of Japan both in promptly acting in accordance with agreements reached at the Washing-ton Conference and in its tendency toward further reductions.

With the information from Paris indicating that the treaties will come before the Chamber for discussion about Jan. 15, and that ratification probably will occur within a reasonable period thereafter, it is hoped by officials here that full ratification will have been given the major treaties by the latter part of February, and that Government regulation is necessary.

4. The replies indicate no organized public opinion in favor of Government confirmed drinkers as a result of the public opinion in favor of Government conformed drinkers as a result of the texchange of ratifications at Wash-transport of the mines. It is felt, rightly or wrongly, that federal operation of the railroads was accompanied by waste and inefficiency, and that industrial progress.

Many of our peasants have become the latter part of rebruary, and that of what governments they pretend to ington will be accomplished shortly the case of the fact that it is anxious to see the treaties in efficiency, and that industrial progress.

The existing state of Armenian has made no secret of the fact that it is anxious to see the treaties in efficiency, and that industrial progress. the exchange of ratifications at Wash-

> Britain Ready to Carry Out Pact A spokesman for the British Government has declared in the House of Commons that Great Britain is anxious for the limitation of armaments."

The complaints made in the French Chamber of Deputies that France has been unable to get the French text of the proceedings of the Washington Conference seem to have had some justification since the copy left only on the steamship on which M. Georges Clemenceau left for France.

The official report is lengthy and could not be taken in at a glance. While it might have been more convenient if the report had been available at an earlier date, officials here are not inclined to take blame for any delay, and point to the fact that the French delegation was furnished with complete stenographic reports, both in French and English, of the proceedings of the conference, not only in open session but also in committee.

BENITO MUSSOLINI WILL VISIT SPAIN

MADRID, Dec. 26 (By The Associated Press)—Benito Mussolini, Pre-mier of Italy, El Liberal says today, will visit Spain in the near future. The Conservative groups are preparing a great reception for him, declares the newspaper.

It likewise asserts that shortly

afterward King Alfonso will visit Italy. The difficulties through which the King has previously been prevented from visiting Rome, owing to the estrangement of the Vatican and the Quirinal, have been overcome, it

ROME. Dec. 26-Signor Mussolini

has ordered the coinage of money in a new design, bearing the fasces, or bundle of rods carried by the ancient Lictors, "as the emblem of ancient Rome and the new Italy, regenerated by the Fascisti." The Fascisti derived their name

from this emblem. KNOXVILLE, Tenn., Dec. 26—The Brookside Cotton Mills here have an-ounced a voluntary increase of 10 per ent in wages, affecting 1500 employees.

TURKS STAND OUT AGAINST ARMENIAN **VOICE AT LAUSANNE**

Kemalists Enter Vigorously-Worded Protest to Near Eastern Conference

LAUSANNE, Dec. 26 (By The Assoclated Press)-A vigorously-worded protest against the decision of the Near East conference sub-commission on minorities to permit the Armenian by the Turkish delegation.

Thus a new discordant note marked the resumption of the peace negotiations. The sub-commission on minorities had planned to receive the Armenian and Bulgarian representatives this afternoon—the Armenians to ex-plain their demands for an Armenian National Home and the Bulgarians to set forth the position of the Bulgarian residents of Eastern Thrace, which is

passing to Turkish sovereignty.

The Ottoman protest, addressed to the president of the sub-commission,

Surprise Expressed

In the official program for today which was received by our delegation I read, not without surprise, that the Armenian and Bulgarian delegations will be heard by the sub-cor minorities. At the end of the last

If, despite the unchangeable attitude

the session must be considered non-existent. The conference consists of two parties. The Allies constitute one party and Turkey the other. Therefore any session at which Turkey is not

Admission of Other States

Despite the logical arguments which furnished the other day in support of our position you have decided now to hear the Armenians as well as the Bulgarians. The Armenian delegation is composed of Turkish subjects, and it pretends to represent Armenians who are Turkish subjects. To enter into con-tact with such a delegation would be equivalent to employing against a state subjects of this same state. Any initiative or step in this direction will only encourage us to suspect the assurances which have been showered upon us in connection with the safeguarding of our sovereign rights. Furthermore it would be helpful to inquire what can possibly be the official character of the Armenians who have been invited and

take care of such cases. I should be it consistently can to hasten ratifica- the Conference are private persons who are opposed to the Armenian Republic

The sub-commission on minorities is going outside the field of its rightful deliberations. The Turkish delegation believes itself justified in not partici-

pating in these meetings.

If the principle is accepted that all private persons who pretend to be delegated by their respective countries are to be given audience by the conference, then the delegation of the Government of the Grand National Assembly of Turkey will have the honor to proof Turkey will have the honor to pro-pose, by the same token, the admission and audience to delegations represent-ing the populations of Egypt, Palestine, Syria, Irak, India, Tunis and Tripoli, and the Moslem minorities of Jugoslavia, Rumania, Bulgaria and Greece, as well as the delegates of Ire-land, who ceaselessly ask our ascistance to secure an opportunity to pre-sent their just and legitimate claims. The protest is signed by Riza Nur

Refugees Return to Smyrna

Bey, for the Ottoman delegation.

BRINDISI, Italy, Dec. 26-Fourteen hundred Italian refugees who left-Smyrna after the fire, have sailed from this port for Smyrna, again to take up their residence there.

CHANCELLOR TO SAIL TOMORROW

By Cable from Monitor Bureau
LONDON, Dec. 26—Stanley Baldwin,
Chancellor of the Exchequer, accompanied by Mrs. and Miss Baldwin; the
Governor of the Bank of England; Rowe Dutton, financial adviser, and Mr. Griegg, financial secretary, leave for America tomorrow aboard the steam-ship Majestic. The object of the Chancellor's mission is to discuss with United States authorities measures for the funding of British debt to America.

COMMUNISTS LOSE MEMBERS

MOSCOW, Nov. 22—The membership of the Communist Party has dropped from 560,970 to 422,875, according to a Itom 500,570 to 422.575, according to a statement published in the Moscow Izvestia. It is reckoned that 46.5 per cent of the members are industrial workers, 24 per cent Government employees, while 5.3 per cent are gathered from various classes.

treatment.

MANCHESTER, N. H., Dec. 26 (Special)—What is generally regarded as a striking achievement of New Hampshire bootleggers who make their headquarters in the southern cities of the State and who are credited with large influence in political circles, was the, Christmas pardon of Robert S. Ayer of Manchester, who was the generally acknowledged head of the bootleggers to get Ayer pardoned. I would have made a big protest. Neither I nor the county solicitor believed it was possible, although we were aware that bootleggers and rumruners were freely predicting a Christmas pardon for Ayer. He is the worst customer we ever had to deal with."

The fact that Ayer served only one sixth of his minimum accelerace is eless, a fanatical national-on racial theories, however so far as America in its prohibition has obvious dangers for experiment, as there is no restriction those who are not deemed to belong here on the sale of beer and wines.

SERGEANT ANDREWS of the potwo holiday pardons.

The pardon was granted without a lice force, who, by orders of the Indian Government, was tried public hearing and without the cus-tomary notification to the public aufor gross neglect and inhumanity in connection with the death of a numthorities who were instrumental in obtaining his conviction last May. Banker Advises United States Accept Sinking Funds ever, even the pigeons must have felt a little bewildered for the whole of and Moderate Rate of Interest

Senator from Utah, member of the Refunding Commission, public by the committee of American business men, has outlined a plan whereby he believes America can consistently aid toward relieving the European situation and at the same time meet the sentiment of the country which seems apposed to the cancellation of the allied indebtedness to the United States.

Believe in Cancelling Portion Mr. Kahn expressed himself as being strongly in favor of the policy of canedness of the allied nations. He wrote: celling at least a portion of the indebt

I am convinced that it would be to

a good investment.

But, if public opinion and Congress of the allied debt, which relinquish-ment, be it understood, is suggested only in return for, and simultaneously with, measures on the part of the European nations to bring about that change of mental and moral attitude and actual conditions which is indispensable if the world again is to be on an even keel then my suggestion would be the following:

allied nations after the armistice, that portion at least as was not applied to the settlement of war contracts here, or is offset by valid counter claim, is intrinsically distinguishable from the balance of the allied debt to us. It should be promptly just in the way of repayment with a reasonable rate of interest. For instance, America might sipulate interest at the rate of 3 per contract and on a purple. supulate interest at the rate of 3 per cent, or 3½ per cent; and an annual sinking fund of 1 per cent, beginning after, say, five sears. The refunding commission ought to be empowered, according to its judgment, to postpone the beginning of interest payment likewise for five years.

Different Formulæ As to the remaining \$7.250,000,000, or thereabouts; there should be no attempt to apply the same formula to every country. The refunding com-mission should go thoroughly into the economic and financial and general sit-uation of all coungries concerned and make a fair and final settlement, sub-

fact to the approval of Congress.

Even upon America's financially most potent debtor, Great Britain, she should not impose the exceedingly should not impose the exceedingly heavy burden of paying 4% per cent interest from the start and redeeming the principal within 25 years. I would suggest in the case of that country, as suggest in the case of that country, as an illustration, that there be paid an annual suking fund of % of 1 per cent.

Such sinking fund, if invested at the rate of 4 per cent, would extinguish the debt in '47 years. In addition to the sinking fund of % of 1 per cent, interest should be charged on the debt at the rate of say, 2 per cent for the first period of eight years, 2½ per cent for the first period of eight years, 2½ per cent for the second, 3 per cent for the third, 3½ per cent for the first period of eight years period.

A similar formula might be applied.

which, if invested at the rate of 4 per cent, would extinguish the debt in 56 years, and charge a purely nominal rate of interest or perhaps no interest at all, for the first eight years' period. The rates of interest for further periods

NEW YORK, Dec. 26-Otto H. Kahn, | than those suggested in the case The question of the feasibility, acceptability and extent of "payment in kind" in lieu of cash should also be

within the purview of the commiss investigations and recommendations. Recommends Representation Mr. Kahn wrote he believed the easily disce United States should be officially rep-

resented on the Reparations Commis-Government," he added should also take official part in the work of other commissions of a similar character, destined to settle controversial questions and aid the recu-

peration of Europe. He declared that "it has now become fairly incumbent upon the United States to indicate precisely and our ultimate advantage to do so. I feel officially, what are the terms, condisure that such action would turn out tions and limitations under which America would be prepared to take part in an organized and permanently will not at present consent to the rese established international effort, to aid inquishment on our part of a portion the maintenance of neare and promote the maintenance of peace and promote understanding, fair dealing and good will among the nations."

Riddance of Hate Is Among

WASHINGTON, Dec. 26—Possibility of "gravest events before the end would be the following:

Of the \$2,750,000,000, or thereabouts, which our Government loaned to the unless the allied governments "act allied nations after the armistice, that at least as was not applied to and foresight hitherto foreign to their policy," is seen by Medill McCormick (R.), Senator from Illinois, who has just returned from a trip through Europe. He indicated that his survey of the European situation has convinced him that the nations of Europe must

solve their own problems. "If the governments," he said, "can not agree upon a sound and reliable program for the definite and final settlement of the total sum of repara-tions which Germany shall pay and can pay, if they cannot agree among themselves and with bankers and investors upon a plan which will stabilize German currency we may expect the franc and the lira to start the declivity in pursuit of the mark. the crown and the ruble."

Three general proposition which Mr. McCormick believes ought to be included in a new reparation's settlement were outlined as: "Priority of payments for the reconstruction of the ruins of northern France.

"Extension of a moratorium to Germany for several years, conditional upon an adequately secured bankers' loan to stabilize the mark, to balance the current German budget, and to contribute to French reconstruction this year.

"The prompt withdrawal of 'the barbarous or semi-barbarous' Muhamma-dan troops from the Rhine and the progressive withdrawal of other troops as the terms of the moratorium and reparations agreement are fulfilled by Germany.

in the case of France, making the sink-ing fund one-half of 1 per cent only, which, if invested at the rate of 4 per "is the exorcism, of the spirit of hate which animates governments and peoples. Unless the peoples are moved Christian comity there can be no real

their rightful property in the wealth produced by their efforts, this may be an absurd error, but it is an erro that is widespread. "Many of the older members of the

party who have worked for years to build up the party are attached to the old formula, but there is, I think, a large measure of agreement among these that a formula is, after all, only a formula; that, as a political party ceived from Ireland presents a patch—a formula; that, as a political party work of light and shade. Speaking in It is the practical measures advocated form of words, if made the condition co-operation by others who attach a different meaning thereto, may well impede rather than hasten the prog-ress towards the realization of their Anyhow, there is not much disposition of any side to get into a heated discussion about the meaning of words, but rather a strong feeling

RACIAL HOSTILITY IN INDIA DECLINES

Statement Made by Lord Reading at Banquet of European Association

By Special Cable

CALCUTTA, Dec. 26-On Sunday night the European Association, which was holding its annual meeting, in pursuance of its new policy, held a dinner, which it is hoped to make yearly function, when the Lord Reading, was present, also Lord Lytton and Sir Harcourt Butler. Lord Reading declared that racial

ostility was not so acute as during the first year of his viceroyalty. Re ferring to the indianization of the raided 117 times and am unable to services, he declared emphatically hold out much longer. I have no there was truth in the impression that there was truth in the impression that the Government was opposed to recruiting in England. He stated that the expressed objects of the European Association were not such as Indians followed his predecessor's example in sible to reach an agreement between could object to. He alluded to the protesting against the Vatican's posiformation of standing committees in the Legislature at Delhi in order to keep the departments in closer touch Pope believes is not sufficiently inde-ficial quarters that the Paris Conferwith the legislatures, as a hopeful ex-

AMERICAN-MADE MACHINERY GAINS WORLD-WIDE POPULARITY

United States Manufacturers Experience \$3,000,000,000 Increase in Foreign Sales in 10 Years

NEW YORK, Dec. 26-American manufacturers have sold to the outside world more than \$4,000,000,000 worth of machinery in the last decade against \$1,000,000,000 in the 10 years immediately preceding, and \$350,000, 000 in the 10 years ending with 1901, and the machinery is now going in increasing quantities to every country

and colony in the world, says today's Trade Record of the National City

Bank. It continues: The list of articles forming this group of "machinery" includes locomotives, automobiles, electrical machinery, agri-cultural machinery, sewing machines, typewriters, cash registers, adding and calculating machines, metal working machinery, mining machinery, textile machinery and printing presses, and the thousand and one evidences of American genius which have made our machinery the admiration of the mechanical and industrial world in every part of the globe, and brought into the United States more than \$5,000,000.

000 from every part of the world in the last quarter of a century in payment for this class of output of our shops and factories. They represent the highest type of mechanical genius in the United States, which Nation leads the world in this particular; and their value both for practical service and as an evidence of high grade workmanship in American

factories is recognized in every part of the world. Evidence of the wide popularity of countries and colonies

motives exported from the United States in even the lean trade year of 1921 went to 35 different countries of the work and in the year 1920 to 45 countries:

and in the year 1920 to 45 countries: cash registers, a very recent factor in the exports of machinery, went in 1921 to 60 countries and colonies representing every grand division of the globe while adding machines, a still more recent factor in the export line, went to approximately 50 countries in the same year.

Elevators and elevator machinery long popular in the United States, but more recently a requirement of the everyday life in other parts of the globe, went to 28 countries in 1921; gasoline engines, another comparatively recent type of machinery, to 7 countries; traction engines, a still newer factor in the daily life of the world, to more than 50 countries laundry machinery to a score of countries laundry machinery to a score of countries. laundry machinery to a score of countries and colonies; metal working machinery, of which the high value can to be especially recognized during the war, went to approximately 40 countries; oil well machinery, in which the United States quite naturally excels, 130 countries; air compressing machiner to a score of countries: cream separ tors to over 30; sewing machines at typewriters to more than 50 countries while agricultural machinery, long standby the world around, went liter ally to every part of the globe as di-also the more recent requirement for transportation purposes, the passange and now the commercial automobile which last year invaded more than 7

adds that "it may be that nationalization is the only cure for the troubles of the coal industry, and if the present commission so reports, I should cer-tainly be inclined to a favorable con-sideration of its recommendations."

License Plan Proposed

Because of the controversial char acter of the subject and the extraordinary frankness of many of the state ments received, the names of the persons quoted are omitted. Among the ost definite proposals are those of the president of a great eastern col-

lege, who offers the following plan: It would seem to me that regulation might take the form of licenses to operators. The basis for the granting of a license should be, first, a guarantee of quantity output (this would elimi-nate the small mines); secondly, there should be established a standard cost of mining (this would eliminate the high cost mines): in the third place, an operator, to gain a license, must guar-antee a certain number of days of work

To operate this form of regulation would require two sets of boards. One board would be regional. Its personnel could be made up of one operator se-lected by the operators of the region. one miner selected by the miners and one man informed concerning the min-ing industry but not engaged in it. board would have charge of grant-

Another board, with headquarters at Washington, should be established, made up of three representatives of operators elected by the operators. operators elected by the operators, three representatives of miners elected by the miners and three men representing the public, appointed by the President. This board should be one that would listen to appeals from the ecisions of the regional board. I addition, this board should determine the quantity basis for the granting of licenses and the standard cost of mining basis. Furthermore, this board could set up a sliding scale of prices for coal. The sliding scale would be necessary in order to lower the peak of production and to enable the operators to guarantee a definite number of days, work to the miners. days' work to the miners.

Would Use Harvester Method

Of much significance also is the recommendation of a manufacturer who is the author of one of the most important demonstrations of joint management that have yet been made. He proposes an adaptation to the minindustry of the International Harvester Company's plan of govern ment. He would allow the men to determine the question of unionization with entire freedom. He would have joint council in each company, a national tripartite body of arbitration,

A discriminating observer in a suburb of Detroit which is filled with Ford Motor Company men-all "consumers" who are "growling over the unaccountable difference between coal f. o. b. and able difference between coal f. o. b. and coal i. t. b. (in the bin)"—reports that there is little sentiment among these men for Government control, of which they are suspicious. On the other hand, "the men believe that about onefourth of the miners ought to go back the farm (to relieve the excess labor problem in coal fields) and the rest be put to steady work and allowed to unionize for the sake of stabilizing prices and reducing competition be-tween organized and unorganized peril.

An unusually well-equipped economist in a mid-western university advises provision for arbitration as a workers are on record as opposing arbitration. This means, as I see it, that they are afraid of outside arbitrators at the time of a crisis, but I feel convinced that if the menace of large and arbitrations are removed and and distribution. unorganized fields were removed and a definite and conscious policy to institute continuous arbitrational chinery were set up, the attitude of the officials of the union would modified on this point."

He brings forward also a technical fact that will doubtless be carefully considered by the commission; name ly, that a great manufacturing concern has found it possible to at one time from one-fourth to onethird of their annual consumption. This suggests to him the developof a sales policy under som form of national control which would promote stability in the industry.

A sociologist who during the war directed a Government research or-ganization, deplores the lack of a disposition on the part of Government officials, without reference to any particular administration, to promote and utilize thorough-going research; the lack of continuous, persistent expression of public opinion on great indus-trial problems, and the disposition on the part of representatives of special interests at Washington to favor regulation of every industry except their own.

WOMEN SHARING RESEARCH WORK

Many Delegates and Speakers on Convention Program

Striking evidence of the participation of American women in research work is afforded by the number of times their names appear on the programs of the seventy-sixth meeting of the American Association for the ated societies, and the large numbers that are registering as delegates, rep-

SEIZURE OF COAL BY STATES PROPOSED

Senator Walsh Would Have Commandeered Supply Distributed Equally at Cost

Special from Monitor Bureau WASHINGTON, Dec. 26-All other efforts having failed to remedy the acute coal shortage in New England which threatens to grow from bad to worse during the succeeding winter months, David I. Walsh (D.), Senator from Massachusetts, in a public letter dealing with the situation, recommends that the respective state governments commandeer all coal at hand and apportion it equally "at bare cost of production and distribution."

In the opinion of Senator Walsh, who was the first member of the Sen-ate to raise his voice against the impending peril of a coal famine, commandeering of coal supplies by the states is the only immediate relief productive of results.

In view of the great number of communications which Senator Walsh has received in reference to the distress ing conditions in his own and other New England states, he has prepared for distribution among his constituents a unique document in the nature of a public letter reciting what he did last summer in an effort to secure governmental action to forestall what has developed. This letter says in

In the light of the present situation massachusetts and other parts of the country. I want my constituents know that I tried to secure action by our Government to avert this situa-tion at a time when action could have been taken with advantageous results. Even in June, 1922, it did not require prophetic vision to foresee what we now know is a cruel reality.

obtaining facts and making recom-mendations for future action—which investigation if it is to be received as those that have gone before will be filed and forgotten—yet I trust I may be pardoned for suggesting that I was the first to raise a voice in the United States Senate against this impending

What can be done now? The present difficulty is that there has not been enough coal produced to supply the seasonal demand. This can not now be permanent institution in the industry, and adds: "At the present time the duction and distribution of coal. The only immediate relief that I can

COUNTY ATTORNEY **CHANGE PROPOSED**

Bill Filed Would Make the Office Appointive One

Amendment of the Constitution of Massachusetts to provide that the Legislature may, if it sees fit, change the method of selecting district attorneys, is asked in a petition filed today with the clerk of the House of Representatives by John C. Brimblecom Representative from Newton.

Mr. Brimblecom would provide in his proposed amendment that the General Court be given power to de-termine whether district attorneys shall be elected or appointed, either by the Governor with the advice and consent of the Executive Council, or by the Chief Justice of the Supreme Judicial Court. These officers are now manent records of the association and elected by districts.

Since the Constitution already provides for the election of district attorneys for such terms as the Legis- benefit of the experience of its predelature shall prescribe, Mr. Brimblecom was asked to explain the intent of his proposal. He said that he believes that recent agitation and experience directs that a change should be made in the method of election or

appointment of these law officers. Mr. Brimblecom also filed a petition to authorize the General Court to have similar powers over the selection of sheriffs, clerks of court, and registers of probate, the latter being a Johns Hopkins University as professtep toward the inauguration of the sor of plant physiology. He still holds

Dr. Slosson Explains the Value of Frank Interchanging and Co-ordination of Theories

there will be no covenant presented to the convention, and the machinery for this new league will consist of the already, existing scientific of anizations. But, according to delegates already present for the first meeting, the idea of this convention will be unique in its emphasis upon the necessity for inten-scientific green-tables, and more elaborate conferences between representatives of various fields of science. At the conclusion, though there doubtless will be serious controversy between them, it is confidently believed the biologist will go forth with the chemist, the astronome will walk with the mathematician, and there will be peace—scientific peace—throughout the laboratories of the

Helpful Exchange of Views

There has been no previous convention of the association which has had so large a place in its program for symposiums upon various vital problems. Through these symposiums it is planned to bring together the representatives of various sciences for an nake it possible to place the knowledge of every scientist at the disposal of every other scientist and avoid un-necessary duplication in work and bring to pass something of an agree-ment upon matters of common inves-

The present convention of the Dr. Edward E. Slosson of Washing-American Association for the Advancement of Science—barring the appear, ance of some Article Ten—bids fair to bring about the establishment of a league of science somewhat after the pattern of the League of Nations.

To avoid difficulty in ratification there will be no covenant presented. man since it considers the proble of fuel and food." He continued:

Photo-synthesis concerns the plan to combine carbon dioxide with water to form various carbohydrates, such as sugars, starches and celluloses. Now, such carbohydrates are at the basis of both our supply of fuel and food—in the latter case through the decomposition of the successful succ tion of this vegetable through long pe-

Viewpoints Co-ordinated

Viewpoints Co-ordinated

The scientific field has approached the problem of discovering the secret of this process and its possible control from two different points of view. On the one hand the chemist has looked at it as a matter of various formula—which he has worked out in his study and then endeavored to verify in the laboratory. The biologist, on the other hand, has taken serious objection to such an approach to the problem, maintaining that it concerned a vital process and could, therefore, be studied—not from the point of view of reactions but from that of structural analysis.

On Thursday afternoon there is a general symposium on the subject of

general symposium on the subject of photo-synthesis at which time the first resentatives of various sciences for an steps toward the co-operative approach interchange of views upon common to this problem will be made. Such problems. This, it is believed, will an attempt will, likewise, be made at the symposium on the progress of chemistry. The results of greater co-ordination between natural scientists working on similar problems in different fields cannot be overestimated. The present convention is the first time so extensive an effort along this line has been made.

FORESTRY EXPERTS TO OPEN CONGRESS

New England Problems to Be Discussed at Three-Day Meeting in Boston

Forestry preservation of existing imber, reforestation and other problems arising from the forest situation of the United States in general and New England in particular will be taken up by experts at the three-day New England Forestry Congress to be held at the Massachusetts State House beginning tomorrow.

The conferences will be held under the auspices of the Massachusetts Forestry Assachusetts

Forestry Association in celebrati its twenty-fifth anniversary. To the congress a success it will have the co-operation of the departments of forestry of the several New England states, forestry associations in this section, and the Society of American Foresters. In addition several specialists of national standing will address the congress. the congress.

Governor to Open Meeting sachusetts, will open the conference Channing H. Cox. Governor of Mas norrow morning at 10 o'clock. At the morning session there will be several addresses devoted to the demand for forest products, Austin F. Hawes. State Forester of Connecticut, will lay a groundwork with a discussion of the New England forests in reprospect, this height the only way in which the

Fifth Avenue and Broadway Argue New York Sign Ban

NEW YORK, Dec. 26-The Fifth moved the sky sign, together with illuminated and overhanging advertisements which tend to become unwelcome, has just launched another campaign to extend a still further sign ban. At first, a city ordinance framed by the association drove such signs off Fifth Avenue over the 51/2 mile stretch from Washington Square to One Hundred and Tenth Street; next, Madison Avenue, between Thirty-Fourth and Fifty-Seventh streets simi-larly was cleared of objectionable over-advertising; and now 300 mer-chants, landlords, and business men on the cross streets in this great sec-tion in the center of New York have petitioned the Board of Aldermen that their streets be added to the restricted

This is the biggest step of all for the city beautifiers, for if the new petition succeeds, an area almost a mile square, close to Broadway, will be unillumined at night by gaudy, coal-consuming signs and undisfigured by day by sky signs and overhanging sidewalk defacements. This is, of course, the language of the promoters of the petition. The Broadway Association, whose incandescent thoroughfare has made its name known all over the world, uses different language.

"While we agree," said J. C. R. Foster, general director of the Broadway Association, to the correspondent of The Christian Science Monitor, "that the restricted plan is all right ciation is on record as being opposed to any such move in its present form into what we regard as our territory

director of the Fifth Avenue Associa tion, scouted any serious opposition to the proposed ordinance. He said There is plenty of room in New York for both Fifth Avenue and Broadway;

both are indispensable to the growth of the city. But the tim really come when the promotion high scale of what is now the cen New York depends on just such as the wiping out of ugly signs. time our petition does go close to Broadway, I admit, but I think we shall be able to show that merchants in the Broadway orbit still have plenty of leeway. But we are determined to go on with what we believe is a profound move for civic betterment. Every time we have nibbled off a bit

more for a restricted area—and that is the only way we have got it—dis-gruntled merchants have fought us hard. But they have been the first to come around after the signs were down and express their amazement that they could have stood in the way of such an obvious improvement.

Fifth Avenue is, of course, a national

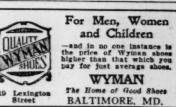

institution. Only the other day, our

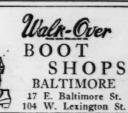

president, Robert Grier Cooke, was asked to go to Kansas City to tell folks here how to conduct a similar cam paign against the exaggerated sign evil that we are clearnig out here. It is not merely the absence of signs, of course, that makes Fifth Avenue beautiful. The residential section north of Fifty-Ninth Street is still the most famous in the world because business is absolutely restricted there, and be-cause the height of new buildings is restricted to 75 feet, making the building of apartment houses virtually impossible. Look at Fifth Avenue some day as it straggles north beyond the limit of the restricted district at Ninety-Sixth Street if you want to see the fundamental difference a sane restriction policy makes in a noble and

FIGHT BY MIDDLEMEN ON MARKET LIKELY

Proposed \$7,000,000 Food Distributing Terminal for Bronx Would Decrease Profits

Special from Monitor Bureau NEW YORK, Dec. 26-Plans for a new terminal market at an estimated cost of \$7,000,000 to be built in the Bronx, on the Harlem River, have been completed with a view to their being placed before the Board of Estimate

The city administration, according to Grover Whalen, commissioner of plants and structures, will urge an imnediate consideration of the project. which will be the beginning of the establishment of four other great terminal markets, the other four to be located in the other four boroughs of Greater New York, Manhattan, Brooklyn, Queens and Richmond. The scheme is the result of legislation passed at Albany several years ago.

The present plans contemplate an

elaborate arrangement, providing for a structure which will house in addition to the regular market facilities a bank, a restaurant, a trade room, a community center room, offices and cold storage rooms, all under the same roof. It is proposed to erect the market on an extensive plot adjacent to tracks of the New York Central Railroad at One Hundred and Fiftieth Street, the entire area to be under cover. All building is to be of steel and concrete and fireproof.

Edwin J. O'Malley, New York City Commissioner of Public Markets, nointed out in an interview that such a system of markets would lessen the possibilities of a shortage under any conditions, and that generally food costs should be reduced 10 per cent.

opposition made to the plan by politicians and the middlemen who prosper under present conditions, according to John Dillon, editor of the Rural New Yorker, who was State Commissioner of Markets several years ago. Dillon is not sure that the building of the five proposed markets will be

"It all depends," said Mr. Dillon to ence Monitor, "on the way the system is managed. It is a matter of proper control. The mere building of terminal markets will not will not be made on the state of proper control. The mere building of terminal markets will not will not be made of the proper control. The mere building of terminal markets will not be made of the proper control. terminal markets will not help. my opinion, the system should be in the hands of the State authorities.

When the matter was before the legislature, it was urged upon the by members of both houses that placing B. the markets in the control of the New Woodward, Walter Kollo and Sig-York City authorities was a mistake. Mund Romberg. First time in Boston. In my opinion, the bills were passed because it was not expected that any action would ever be taken by the city, and that if it did the plans would be defeated by the middlemen, and the big packing interests. It goes without saying that strong opposition to any terminal market scheme will be fought by the people who are now making profits. They do not want cheaper distribution of food, which is the aim of the terminal market."

Marcus M. Marks, a leading Republican and formerly Borough President of Manhattan, talking to the Monitor representative, ridiculed the idea on the ground that New York City was without sufficient funds to spend \$7,000,000 for the Bronx market. "I \$7,000,000 for the Bronx market. "I material provided by the story, and number of "The Last Waltz."

am inalterably opposed to terminal by the substitution of Sigmund Rommarkets, and do not think that scheme is any solution of present difficulties," said Mr. Marks.

Ruth Chorpenning Osrio.... Player King. Player Queen Prologue.... Lucianus.... Bernardo Mabel Moore .Edwin Cushman

Walter Hampden began a three weeks' repertoire engagement last evening at the Boston Opera House with a performance of "Hamlet" that renewed all the pleasure that he has given to Boston theatergoers in this play in his previous appearances. His formance of "Hamlet" tends to prove characterization, apart from a gain in that Hamlet was a good actor; forcefulness, remains as it was in general outlines. This is a princely intelember of the actor in lectual Hamlet. As a reading of the the princely personage. part alone the performance would be

Mr. Hampden's first aim, evidently, has been to bring out the human side of Hamlet. Here is no austere personage, aloof from the rest of mankind in his grief. Always this Hamlet is seeking to hold his few friends near to him. This quality is not a gloomy performance. For makes the more poignant the break one thing there is the oft-praised makes the more poignant the break and Guildenstern, when Hamlet finds that they have lent themselves to Claudius' plan to the picture. provide him with boyish diversion. This Hamlet is courteous to the exasperating Polonious, as was made pointed in the prince's warning to the for argument in support of her idea. players not to make fun of Ophelia's Miss Mabel Moore was a pathetic father. Indeed, throughout the play Ophelia from the first, an attitude Mr. Hampden has proceeded in a that has a steady effect though it straightforward manner by taking the somewhat discounts the tragedy of with all its seeming contradic- her later scenes. A good "show." The fun is clean if crude; the voices are good enough; the tunes are "catchy" and the orches tration varied and rhythmic: the set ting and costuming are attractive; and the dancing is probably equal to the best in musical comedy. But what makes it all go is more than that; it is the unflagging "pep" that animates the entire cast and the orchestra. Though the latter did lag the least bit behind the Sunshine Girls once or twice, one sympathized with the players; even if they have been following those flashing feet for two years, it must seem next to impossible to catch

The plot, while not taxing, is sufficient, consisting of interlaced triangles Billy van Cortlandt is engaged to marry Ruby Manners, but leaves the customary attentions to his cousin George, while he himself finds keener interest in Rose-Marie, dressmaker's assistant, engaged to Chesty Costello who arrives on the scene fresh from Sing Sing. Billy finally presents his fiancée to his cousin, who appears to care more for her, and wins Rose Marie from Chesty by the old-fashioned

method of combat.

ARMENIA'S NEEDS TOLD BY TEACHER

Former Instructor in Tarsus School Says America Can Save Christian World

America could have rescued Smyrna and can save the Christian world, says the Rev. Klachadoor Kroozian, a native of Van in Armenia and once a teacher in the United States school in Tarsus, Cilicia, in a letter analyzing recent troubles in Armenia and Smyrna, and declaring that America owes a debt to Armenia. He was in Boston for several weeks recently and is now in St. Louis. His

I know very well what Armenia owes to America, therefore I know what America owes to Armenia.

As a preacher and instructor I was connected with the American missionary work in Turkey for a period of 34 years. Rescued from the Smyrna fire by the aid of the Near East Relief, I have come to this country to bring you this message.

Your Banner Worked Marvels

I saw the Star-Spangled Banner of America work marvels amidst scenes of ruin and bloodshed. I am convinced that America could have rescued Smyrna. I am also convinced America can save the Christian and her honor. In these days, the fate of mankind is once more fore a tribunal of men at Lausanne, I deem it my duty to bring some facts audience that constituted itself a reception committee last evening is any indication, Lightnin' Bill will be with us long enough to become a voting Bostonian.

To place a finger on the reason why those who leave a performance of this play to insist to their friends, "You must see 'Lightnin'," is difficult. There are many reasons. "Lightnin'" is American, with all the fundamental ingredients that have made successes to the attention of the American public in regard to a treaty signed by the court room act to one of hearty comedy. Thomas Maclarnie as Judge Lemuel Townsend its amusing if a bit exaggerated at times.

Jason Robard as John Marvin proves himself a capable young actor in a comedy-barren part. Paul Standard and the Turks consequently took their revenge on their innocent.

whom is his would-be fiancée, come to hire the show for a lawn party. The snowball of circumstance which brought the hero to this point now melts as fast as it rolled up, and Lord Cyril's disguise is penetrated, to the awe of the circus folk and the lasting admiration of his fiancée, when everything turns out as it should.

As to the acting, the most convincing occurred in the first act at the inn, where the two girls were played by Miss Standing and Miss Willard and their escerts by Mr. Clive and Mr. Rogers. Warwick Buckland as Mr. Lamb, landlord of the Riverside Line Royal and their escents of the Riverside Line Royal and their escents by Mr. Clive and Mr. Rogers. Warwick Buckland as Mr. Lamb, landlord of the Riverside Line Royal and their escents by Mr. Clive and Mr. Popers. Warwick Buckland as Mr. Lamb, landlord of the Riverside Line Royal and their escents by Mr. Clive and Surgering in order to get the fina cial aid to help the victims.

Drew Armenian Boundaries

Drew Armenian Boundaries
On the request of the Allies, Mr. Wilson, who will be called the Light of American History, drew the boundaries of Armenia at the White House as the President of the United States. Since then the Armenians of Cilicia, Asia Minor, and Mesopotamia have almost been wiped out of existence, and the remnant is scattered around under forceign skies, homeless, hopeless, without a country and without an earth to set their feet on. The American Nation cannot wipe Mr. Wilson out of American history and cannot refuse to accept the glory brought home by him.

The American Red Cross, some other institutions and particularly the Near East Relief have apprificed millions of

East Relief have sacrificed million dollars to the work of rescuing remainder of the Armenian race. proves the deep sense of duty of American Nation. But is this ento quiet the conscience of the Nation to do for the political and financial the country has suffered in additionable to the moral repsonsibility it profess have toward the Christians of the East? The participation of the Acican Nation in the World War be either considered as a great mis or as a hig self-sacrifice to insure manent peace for the long-suffermartyred Christendom.

After the Armistice, many American ditional or Greeks were killed.

Armenians or Greeks were kill He says that in the Smyrna pillage, he saw personally an "Armenian-American citizen and a university graduate, captured by the Turks." He saw the man cast himself into the sea and today, he says, "his widow and children are left without a protector or supporter." He continues:

Our Readers Want Fine Architecture in America and abroad, with the main awards the prize. idea during their lives to erect buildings that will prove permanently satstactory and pleasing in this country: In the case of monumental work, last for all time; in the case of business buildings, to last for 20 years; in the case of residences, the life of the owner with the possibility

of creating family homesteads. On the question of style for America, the Georgian renaissance developed into our American Colonial seems to be most fitted for a general type in the United States, but just as our country is remelting and fusing humanity from all countries, so our architecture takes its rise from many sources. This has resulted in frightful conflict in many of our cities and towns, but they are gradually becoming somewhat more harmonious. A seem like meeting an old friend. For result of study necessary to be given in that place before, and then better combination can there be than town square with a renaissance town the reason comes to you why you feel well-informed clients working with hall, a classic library and a Gothic so much at home; it is that at your well-trained architects for better church can be carried out so as to create a more striking interpretation of character desirable in the different

buildings than would be given if all three buildings were of the same style. There is nothing in this desire to develop architecture as a fine art through the public educated to demand good art that is at all out of keeping with good construction or good plan-ning. Construction, as a rule, expresses itself in the best design, and poor construction will prove so offensive as to overpower any feeling of satisfaction that might come from the best thought out motives. The plan is the soul of the design. If the Ecole des Beaux Arts has accomplished nothing else, it has at least taught its tudents, and all the American architects influenced by them, that if the plan looks like a good composition, the resulting building is likely to ap-pear well. The combination of an American architect trained in Paris. fluenced by the Ecole des Beaux Arts with sufficient practice to understand American needs and tastes, is likely to achieve enduring results. Back of this, however, is needed the educated American public who demand more than a mere building, and who will insist that the architecture of the future must be a fine art.

played the solo violin part for the concerto in G minor. He depended on his notes, but achieved flexibility and The problem of the young architect is similar to that of the young doctor or young lawyer. Self advertising would doubtless be his ruin; his work has been heard from his violin on previous occasions. There can never must speak for itself. Good work will bring wide reputation; still he must not underrate his own abilities. A story is told of an engineer who charged \$25,000 for a consultation fee. His employers thought \$5000 was enough, and the matter came to court where he was asked why he felt called upon to charge so much. "Because consider myself the best engineer in the country," was the answer. A friend of his expostulated afterward, asking him how he could bring himself to make such an extreme statement. The answer was, "Well, you see I had to because I was under

Summary of the Series

The articles that have been published in the Monitor since June 5, 1922, every Monday, touch the field the B minor mass. of architecture at many points. The novelist, with an architectural training, Mr. William J. Locke, suggests of his Whistlerian fastidiousness and that the name of the architect should debonair distinction. This was the connected with his building in a way similar to a sculptor's, painter's first movement may sound a little or musician's. Mr. Walcot has found that the art of architecture belos him ways with the art of architecture belos him ways with the art of architecture belos him ways with the art of architecture belos him was ways hut the ardeans with the himsens leaf than Bartok's quartet introduced by charm. Not quite so fortunate was that the name of the architect should debonair distinction. This was the be connected with his building in a Lalo "Symphonie Espagnole." NE is often prone to forget, through the roseate illusion of some revered name, that artists, however great, have all had off moments. No true creator, whether in paint, in word, or in action, can live sessor. ments. No true creator, whether in paint, in word, or in action, can live his life without giving to the public an unnumbered quantity of mediocre or average work, the type of product which is excellent, but falls short of genius. In the early days of their recognition many artists, now rated as masters, past or contemporary, have sold their canvases for daily bread. It is impossible, therefore, to point to any work of art and say, stands out, though tucked away in a

survey of American art from the days and between the fixed objects upon of Inness, is not so inspired as one the banks, on one side the towering might expect from the presence of such masters as Twachtman, Blakelock, Alden Weir, Mary Cassatt and Theodore Robinson.

The Inness and the Blakelock, both landscapes—the one trees against a ruddy sunset, the other trees and fields in summer—present an interesting basis for analysis. They possess a far richer finesse than the green and white speckled Frieseke, with its white women, its white flowers, and its flecks of globular green leaf units. One is taught that Inness and Blakelock as American masters had an unquenchable supply of imagination, Inness and Blakelock unquenchable supply of imagination, but unless one is a dutiful though unupon the paint. The greens are blackning, even the sunset is gradually to an afterglow.

"Albano, Italy," by Inness, dates each to 1874, and provides a gauge whereby an observer may trace the gradual development of modern freedom in the use of paint. Yet paintings which one desires to possess and paintings which one admires are not often identical. The Inness, the Blakelock, the Twachtman, poetic, perhaps, a symphony in light greens and yellows, with a fine sweep to its diminutive valley, the Alden Weir, barren in the aridity of his gray painted foreground, and somehow missing the obviously intended illusion of distance in far-away trees and hills, all seem half-hearted examples of work by artists whose standing would seem to cry out against the display of but half-representative cre-

An Historical Survey

Apart from the permanent collections in museums, or in private galwe are seldom privileged to view the work of these men, whose names are known wherever the art of painting has penetrated. And to turn from them, as one does in the present collection, to those whose essage is far less significant seems little short of heresy. It is difficult to believe that those who will organize an exhibition of this type, if they be artists, or lovers of art; have thus determined to trade upon the sacred name of American masters.

The Mary Cassatt is, perhaps, more truly representative, a canvas both sensitive in feeling and in execution.

tude one finds more congenial contact. As intimate notes with which to live, as color creations which bring pleasure to the eye, neither the heavy tones of the older masters nor the daring spots of the new produce the

SPANISH STUDENTS

Action Comes After Policemen Use Machete and Revolver on Scholars

MADRID, Spain, Nov. 28 (Special Correspondence)-A general strike of university students throughout Spain is now in progress, the subject is causing the Government and Parliament the most serious anxiety, and developments of a political character far beyond the community of students are feared. This is a case, it is suggested, and the first of its kind on record of a great political movement or upheaval originating with the schoolboys. Madrid has been in a state of excitement as the result, especially during the students' candle processions at night, and at Barcelona, Valladolid. Salamanca, Seville, Saragossa and other university towns grave happenings are reported,

The origin and circumstances of the new students' strike movement are extraordinary. The present strike is evidently of political origin and sugrests enormous possibilities if the students are thus to be constituted as a political force. In Madrid they have had for some time a students' federation, and there are corresponding federations in other university towns, while there are links between them and such a close bond of sym-pathy that when the news of the Madrid strike was known in the provinces there was little delay in re-

The Young Maurist societies all over the country are the most en-thusiastic organizations of their class, and the universities incline that way. Now it is believed that the Maurist elements in the university, assisted if not instigated by Maurist elements outside it, are responsible for the present strike and all the disturbances hat have taken place

Had Good Excuse

The students, according to the general view, had a very fair excuse for their opening. The authorities, being suspicious of them and what they attention to them. The police drew the students. up closer, and were seen at times to The Faculty of Medicine was the one which most attracted notice at first and which provoked the open conflict. Resenting the attitude of the police the students of this college proceeded This their place at 10:30 one morning into the Calle de Atocha, one of the street arteries of Madrid, they perceived one of them, an officer of the Guardia de Seguridad, named Parrondo, traveling shouted out at him and hissed him.

He made a sign of getting off the car, they hissed the more and then Parrondo, who is evidently a hottempered man, jumped off the car and holiday. closed up with the students. He was not really on duty at the time and he quite forgot himself, immediately drawing his machete, or heavy short sword, and swinging it around, the students fleeing to the gateway of their college. The policeman followed them there, and the students then promptly rained stones on him and drove him out, and, continuing their attack, compelled him to take refuge behind a newspaper klosk.

Then he made his second mistake, for, drawing his pistol, he fired indisfor, drawing his pistol, he fired indis-criminately on the student mob. Ten Mayor, two being wounded. shots rang out and six took effect, not all on students. In the Atocha there was at once general panic, and a great RUBBER PROCESS floise and commotion. Having emptied his revolver, Parrondo fled, pursued by students and the general public. Later, with everybody's symnathy with the students, and conrondo was arrested and is now in

Many Stones Thrown

affair, and the students rose to the Parrondo business gave definiteness and openness to the struggle. The university professors and authorities sided with the students while at the same time deprecating violence and Rubber Culture Company, Amsterdam, appealing to the young men to come have secured the rights of this inquietly to their classes. However, the vention, and will put it into force in students had a meeting of their own all colleges being represented, and they declared a general strike until the Director-General of Police had been dismissed, called for the opening of an inquiry into what had happened and asked for the support of all university centers in favor of their pro test and a practical sign of such support by joining in the strike. Señon Sanchez, president of the Studens' Federation said the police had been to his house with the object of arresting him, but he was absent.

The professors themselves at the

same time had voted for the closing of the colleges for three days, and, further, the authorities of the Central University met and resolved to close and to keep closed the university until satisfaction was given "in such a form as would constitute a guarantee for tranquillity for the future," and to present to the Government its strong protest concerning the recent events and its expectation that proper punish-ment would be inflicted upon the

The affair at once came up in debate in Parliament, Senor Besteiro, one appealed to by the conductors of street cars and other persons with

WARSAW, Nov. 28 (Special Correspondence)—Warsaw soon resumed a normal appearance after the elections. Posters and election lists have been removed from the walls and political excitement has abated. The new mem bers of Parliament are engaged in looking for accommodation, a difficult matter considering the overcrowding

The house owners are hoping that the new Diet will annul the lodgers' kept in due repair, but a certain propensable. Building goes on very slowly on account of the dearness of materials. Nevertheless a certain improvement is visible in the town houses are being cleaned and repaired; many of the former palaces of Polish magnates have been restored and are being used for public offices.

In spite of the high prices the shops are resplendent with articles of necessity and luxury, the streets are full of animation, theaters, concerts, cabarets, cafes full of people and there is no lack of life in the capital. The elections have shown that there is no very strong Communist movement in Poland even among the workers, and of course the peasants have no inclination in that direction.

spicuous place in the Colonial and Revolutionary history of the United States. It may justly be claimed that this spot is the one place on the con-tinent where Americans, English, French, and Canadians may clasp hands on a common-ground. Here each of these peoples had their de-feat and also their victory. And so, in view of the recent restoration of the fort through the patriotic interest of Stephen H. P. Pell and Col. Robert Thompson of New York, it seemed fitting that a token of remem-

Ft. Ticonderoga occupies a con-spicuous place in the Colonial and

brance should go to the lamous regi-ment that took such a glorious part in its history. To this end a richly bound book, designed and executed by Ethel Diehl and illuminated by Maj. Ernest Clegg of New York, was recently presented with appropriate ceremony by Alfred C. Bossom of New York, architect of the restoration.

The book, a work of exceptional beauty and finish, was bound in dark blue Morocco, cut from a 10-foot skin of beautiful grain. The color scheme is of foyal blue, red and green, the colors of the regiment. Miss Diehl employed the bonnet badge of the Black Watch as a center cartouche on the front cover, with the corners tooled in geometric design, suggesting the Black Watch tartan. Silk tartan was employed for the dublure with silk head bands of the same colors. The volume, which measures 16¼x13 inches, is adorned with metal clasps bearing the regimental badge.

The dedication page is exquisitely illuminated by hand in the three colors in a style suggestive of the reed and quill work of the monks of the Middle Ages, but introducing appropriate motifs. It is inscribed "To the Black Watch, Royal Highlanders, Forty-Second-Foot, in memory of the dauntless valor they displayed in the attack upon For: Ticonderoga, New York State-in 1758. Presented by Alfred C. Bossom, architect of the restoration

Berlin Takes Strong Measures to Keep Out Persons Who Seek to Enter Country for Speculative Purposes

(Special Correspondence)—An interesting speech was made by General Smuts at a banquet given in his honor out by foreigners from countries by the Transvaal Manufacturers' As-sociation in Johannesburg. The chair-their own. • The German passport office in Vienna has just received in man, Mr. Maytham, said that the won-derful growth made by South African vigilance and restraint in the issuing

It became necessary to call in the police to keep back the crowds.

Similarly stringent measures have also been taken on the German-Austrian frontier, especially on the Bavarian line. The Bavarian Minister of the Interior

of the Interior has stopped the so-called "Nahreiseverkehr," that is, the local inter-frontier traffic. Formerly when the mark was so much higher than the crown, the Germans along the frontier went into Austria to buy feodstuffs, clothing, and other articles Now the situation is completely reversed. It is the Austrians who have become the buyers and they have been taking advantage of the low prices in Bavaria to such an extent as to endanger the vital interests of the home

The tremendous fall in the mark, added to the enormous increase in prices generally, has proved a great

LINEN SHEETS—Bleached Lines Sheets, plain hemmed. 2x3 yards. per pair 53/6; 2½x3 yards, per pair 55/9. Larger sipes also stocked. Write today for samples, together with catalogue No. 38-X of Lines Table Cloths, Napkins, Sheets, Pillow Cases, Bedspreads, Towels, Faucy Liness, Shirts, Collars, Dress Lines, Lingerie, Blouses, Handkerchiefs, etc., sent post free.

Robinson & Cleaver Belfast, Northern Ireland LTD.

VIENNA, Nov. 30 (Special Correspondence)—There is no busier place in all Vienna at the present time than the German passport office. Long before 8 o'clock in the morning, when the doors are opened, hundreds of people are waiting to get visas to enter Germany. Their number increases so greatly during the day that it is quitte impossible for the extra large staff of officials to deal with all their applications and scores of impatient travelers are forced to come again the next day.

disaster to the Vienna hotel keepers, and indeed to the whole trade of the city. The strangers have nearly all departed, whole floors in the hotels have been closed, the restaurants and concert halls are no longer filled. All the trains to Germany are crowded, it is impossible to get sleeping-car accommodation, and first-class passengers are forced to come again the next day.

patient travelers are forced to come again the next day.

The sudden fall of the mark has caused an enormous inrush to Germany and a corresponding exodus from Austria. All the so-called "Schiebers" or war-profiteers are hastening to leave Vienna and Austria, where prices have risen to a figure which makes life as expensive as in London or Paris. There are no longer any great bargains to be had in Vienna and the hungry horde of foreign speculators find no profit in remaining here.

The Germans apparently have no intention of sitting down quietly and

YEAR-END QUIET PERIOD IN STEEL NOT IN EVIDENCE

First December Since 1917 Operations Not Declined-Prices Hold Firmly

indication of the favorable conditions prevailing in the steel industry in the United States is the fact that opera-tions continue to expand at the close will be selling at 15 a pound by the

the last week that prices that were of the margin of consumption over threatening to weaken have hardened production and to the increase in buyconsiderably, particularly bars, plates, and shapes which are nearer 2 cents a pound, Pittsburgh, than they were a week ago.

companies have placed contracts for considerable number of tanks in the east which will require plates. Inquiries pending for freight cars total 46,000 cars, requiring nearly 500,000 tons of steel, the greatest amount ever in the market at one

Steel bars are still in good demand, particulary from makers of auto-mobiles and agricultural implements. One of the large automobile corpora-tions is inquiring for 200,000 tons of steel for 1923 delivery, chiefly bars, Greater prosperity among the farmers has stimulated the demand for farming implements.

Tool Steel in Demand

One of the new developments in steel has been the greatly increased those in the outside market are on a demand for tool steel, indicating a great expansion in machine-shop activity, Probably, too, the demand has cause of the tariff.

general level of iron and steel prices may be regarded as stable, those FIRESTONE NOT rising slightly being balanced by those

which decline. Some items of steel scrap have ad vanced 50 cents a ton because of the neavy operations in steelmaking which coke is up \$1 a ton, ranging from \$8.50 to \$9 a ton, Connellsville. The advance is due chiefly to the taking of coke for depending to the taking of have made scrap more scarce. Furnace coke for domestic heating purposes ect said to include plans for the erecbecause of the coal scarcity; also be- tion of a large factory near Ridgeway cause several furnaces came into the W. Va., and the purchase of large market at once to prepare for the tracts of land for a workers' home heavy orders taken in pig iron. Pig site. iron went up \$1 a ton in the Buffalo A

Light Rails Cheaper

forging billets have fallen to \$41.50 a ton, Pittsburgh. The demand for sheets has been so heavy that predictions have been made of a \$1 to \$3 a ton advance on the part of the independent steel companies.

Blue-annealed sheets are now quoted at 2.50 cents a pound, Pitts-burgh; black sheets at 3.35 cents and materials that was declining so dras- ment. tically in the last few weeks. that they are beginning to rise it will assure the strength of finished mate-

Merger of Interest

risen to 14% c a pound, the highest price since November, 1920, when a 1514c level was reached. This is nearly 1 cent higher than a fortnight ago. Copper rolled products were advanced ½ cents a pound in two

steps. Sales of refined copper in December will probably total more than 200,000,000 pounds, the heaviest this year, with May ranking second with a trifle less than that figure. When prices first began rising con-umers who had been lethargic in

covering their requirements for the future jumped into the market simul-taneously. This also brought into the market users of finished copper and hence the movement gained great momentum. Producers feel that the higher prices are justified and the advance since the first of the year NEW YORK, Dec. 26 (Special)—An has been very moderate, compared dication of the favorable conditions with the action of most of the metals. Copper sold at 13%c a pound in will be selling at 15c a pound by the beginning of the new year. The spurt ventory-taking period. This is the first December since 1917 that operations have not tapered of show. to believe that cheap South American Business has been so satisfactory American prices, to the continuation

ing of finished copper products. Zinc Sells Lower

Zinc prices declined gradually but continually during the week, being \$4 a ton lower at 6.90 cents a pound, East St. Louis. There was very lit. tle buying either domestically or abroad

Though the brass makers have taken fair quantities in recent weeks the galvanizers are not buying heavily although they are short of stocks as evidenced by the frequent requests for rush orders on small tonnage A surprise to the trade was the \$3 ton advance in lead on the part of the American Smelting & Refining Company to 7.25 cents a pound, New

York, and 7.05 cents, East St. Louis This was the twenty-third consecutive rise in the last year and a quarter. For the first time this year lead prices of the leading smelter and

common level. Tin closed the week at the highest price of the year, 381/2 cents a pound. been stimulated by the duty on tung-sten, an important ingredient in tool higher sterling exchange. Volume of steel, which will probably advance be- sales has been very moderate both here and abroad.

TO BUILD IN WEST VIRGINIA

AKRON, O., Dec. 26 (Special)-H. S

A statement issued by county offidistrict, now being quoted at from \$26 cials at Martinsburg, county seat of the county in which Ridgeway is located, says that no land has been deeded in the name of Firestone there, Light rails have declined \$1 a ton and while land in that neighborhood to 2.10 cents a pound, Pittsburgh, and has been purchased recently there seems nothing to connect the name of the rubber manufacturer therewith.

WYOMING CRUDE OIL PRICE UP

CASPER, Wyo., Dec. 26-All grades of Wyoming and Montana light crude galvanized sheets at 4.35 cents. It oil have been advanced 30 cents to 35 will be noted that all of the price cents a barrel, due to the Sinclair bid advances during the week were in for royalty oil from Salt Creek being raw materials. This was the class of

> The Texas Company in New York has posted a price of \$1.05 a barrel for Salt Creek, Wyoming, crude oil. This is an increase of 35 cents a harrel over the previous price.

Wilson W. Butler

ROBABLY one of the most interesting personalities in Canada's industrial and financial world today is Wilson Workman Butler, president and director of the Canadian Car & Foundry Company. Mr. Butler is the man who, before the breakdown of the monarchy in Russia, negotiated huge shell contracts for his company with that country, and later brought to Canada the large mine-sweeper order placed by the French Government. Mr. Butler is an aggressive and hard worker, a keen organizer, and good Just now his whole energy is being devoted to encourage Canadian Government to unbend from its position of strict economy sufficiently to place sizable orders for new rolling stock for the Canadian National Railways.

A native of Danville, O., Mr. Butler is one of a number of Americans who have found their lifework to lie in the Dominion. He came to Mon-treal in 1901, establishing the Simplex Railway Appliance Company, of which he became vice-president and director. He later established the Dominion Steel Car Company, of which he also became vice-president and director. It was at the plant of this company that Mr. Butler superintended the building of the first all-steel railroad car to be constructed in Canada

Mr. Butler's early business experience was gained in the service of the John Shillito Company of Cincinnati, and as western manager for the Sterlingworth Railway Supply Company of Chicago. His other business connections in the United States included: Western sales agent, American Car & Foundry Company, Chicago; second vice-president and director. Simplex Railway Appliance Company, New York; second vice-president and director, American Steel Foundries, New York.

From his Dominion Steel Car Company, Mr. Butler, together with associates, organized the present Canadian Car & Foundry Company, Ltd., through the merging of the Dominion Car & Foundry Company, Canada Car Company, and the Bhodes, Curry Company. This company is now the largest of its kind in the Dominion.

Besides being president of the Canadian Car & Foundry Company, Mr. Butler is president and director of Pratt & Letchworth Company, Ltd., and director of the Mount Royal Hotel Company, Ltd. He is a member of numerous clubs in New York and Montreal. His home is in the latter city.

case with some others. Car Orders Heavy

The efforts of the railroads to place themselves in a position to handle the large traffic which is expected to continue through 1923 probably will be an important factor of strength in the industrial situation during the coming equipment continue in large volume. More than 46,000 freight cars are now in the market in the Chicago district, according to leading steel men.

Orders for 1300 cars were placed in this district in the last week, all by the Chicago, Milwaukee & St. Paul Railway. Of this number 500 box cars were awarded to the General American Tank Car Company and 800 Rogers ballast cars to the American Car & Foundry Company.

WHITE OIL'S DEFICIT

UNUSUAL PLANS BEING MADE FOR 1923 SHOE TRADE

Manufacturers Expect Business to Surpass Any Year Since War Ended-Prices Lower

Footwear business of 1923 is expected to surpass any year's book-ings since the turbulent times resulting from the war.

Probably not within the history of the Boston shoe industry have manufacturers so thoroughly prepared their lines to meet the view of the buyers either in style, quality, Manufacturers have broken away from traditions and subordinated everything to meet the demands of the prospective trade.

Prices compared with those of a

year ago average a decline of about 10 per cent, and although they lack a uniform scale, so proverbial with eastern manufacturers, differences are being equalized by the reputation of those whose quotations range at the peak of market prices.

In the west and south great progress is noted in the increasing out put of reputable shoe plants. Condi-tions in both those sections are good. It is commonly assumed that the coming spring's demand may surpoint of pairs made even the remarkable activity of the war years and reveal a development in the ar of shoe making carried into grades within the reach of average ultimate

Leather Conditions

If expectations in the leather market are only half realized, the coming

season will prove very active. Union sole leather has been fairly ctive; in fact, so well sold in the grades that receipts are allocated among a waiting clientele, but the medium, light, and ex-light weights are in good supply. Just now sole cutters are the chief buyers of the lighter leathers.

Prices for the last week averaged as follows: Prime heavy steer backs, 55c.; cow backs, 48-46c; light cow backs, 46c; better selections of country hide backs, 44-42c; first quality union bends, 68-65c. The Philadelphia market is quiet, and Chicago tanners report sales as small.

Union offal, top grades, is having a smart call in the Boston market. range for No. 1 shoulders 32-30c. Bellies are extremely active at 23-20c Heads are dull, with quota-

tions 14-12c. Oak tanned sole leather is moving slowly excepting lots going out on back orders. Prices on heavy leather hold strong, but the lighter stock is a bit easier. Choice selection of finders' bends bring 90c, but prime factory bends sell at 75-70c. Philadelphia and Chicago tanners report a typical yeardullness. However, prices firm, the scarcity of heavy steer backs keeping the better grade at 58c flat with a good run selling at 56-54c. Heavy cows are 52-48c; sides, tannery run. 45c.

Oak offal is slow of sale excepting choice bellies which have had a good demand for the last 10 days. rule strong for stock of quality, al-though unchanged from the previous week's quotations.

Calfskin Affairs

Boston calfskin tanners report trade as dragging along toward an expected activity in the near future.

Plump skins are in no great supply. so the top grades are strong in price sionally and are offered at about 5c less than colors in the varying grades. The novelty tannages are being freely sampled, and so it is evident that such stock will round into an active condition as the season advances.

Sides upper leather tanners east\$23,017,190 and west are fairly optimistic regarding the future, although the sales for the current month have been small as to quantity, but it is obvious that buyers are interested beyond such limita Quotations are strong and listed as follows: No. 1 colored chrome sides 30-27c; seconds 25-22c; thirds 21-18c; cheaper sort 16-14c. Black chrome moves slowly and offered at the usual differences of 2c

First quality of bark and combinatannages are comparatively active, the better grades selling at 28-25c; medium selections 22-17c, with cheaper lots booked at 15-10c grade elk is quiet at 30-28c, although here is some movement in a prime quality at 26-24c, but a better one in grade offered at 22-19c. Cheaper ots are on sale at 18-16c.

In a broad way prices are strong, ne lower grades liable to get oversold.

Patent Leather Quiet

Patent leather tanners are now in he midst of a dull period. New business is scarce, and old orders are about completed. Prospects spring's large demand are bright because shiny leather is much in favor with ultimate consumers, and is prominent in the sample lines of. ladies' footwear; also in top grades of men's low cuts and slippers.

Prices are very firm on all grades No. 1 patent kips are quoted at 48-44c, with lower quality offered at 40-35c. Choice patent sides are held at 45-40c; seconds 38-32c, also a cheaper grade at 30-25c. Lower and odd lots are to be had from 20-15c. Bark patent sides are firm, with a developing demand. Firsts are offered at 30-28c; medium grades 26-22c, with a fair quality at

Boston glazed kid tanners are look ing for more business next month, but at present report sales small and

Large operators are always in evidence during a dull time, but their offers are uninteresting to a big tanner. However, prices do not seem to waver under the strain, in fact the topme grades of colors sold last week at \$1-90c, although a prime skin was booked from 80-70c. Grades most in year, as it has been in the one now closing. Although orders for more than 150,000 freight cars have been placed this year, the inquirles for sale of capital assets, and other items.

The White Oil Corporation and subsidiaries report a deficit of \$354,609 for the nine months ended Sept. 30, after deductions for abandoned leases, losses on sale of capital assets, and other items.

foot and more spread, which are on the market at 30-22c. Cheaper lots are to be had but prices are uncertain. Philadelphia tanners are waiting for trade to get underway but report many inquirles for high-graded skins. Ship-ments are daily on unfilled orders, but the local trade is desultory. Both the Philadelphia and Wilming-ton tanners are confident of a large increase in their foreign trade during the coming year.

GALVESTON MAKES **GAINS IN EXPORTS** OF FLOUR, RICE

GALVESTON, Dec. 23-Flour exported through Galveston in November totaled 15,346,045 pounds, compared with 9,628,402 in October; rice exports aggregated 3,021,768 pounds, compared with 655,492. Of metals, 336,065 with 655,492. Of metals, 336,065 pounds were exported in November, compared with 303,140 in October. Exports of cottonseed meal aggregated 9,196,364 pounds, and cottonseed cake 19,903,003 pounds, compared with 10,228,303 pounds, and cake 21,846,443 pounds in October.

Exports of lumber, staves, and logs totaled 1,006,920 pounds in November, compared with 2,298,350 in October; sulphur exports aggregated 19,264,000

sulphur exports aggregated 19,264,000 pounds, compared with 37,632,000; lubricating oil exports totaled 104,702 pounds, compared with 201,838 in October; textile exports were 313,231 pounds, compared with 430,689, and miscellaneous commodities aggregated 72,290 pounds, compared with 1,451,328

QUESTIONNAIRE SENT OUT BY THE CONSOLIDATED

NEW YORK, Dec. 26-W. S. Silkworth, president of the Consolidated Stock Exchange, announces that a questionnaire is being sent all nonmembers who have wire connections with the exchange to take its ticker service. Any firm failing to answer service. Any firm failing to answer the questionnaire satisfactorily will 80,000,000 bushels of American grain have its ticker removed and wire have its ticker removed and wire service discontinued at once, it is

The quotations of the exchange are frequently the greatest assets for obtaining business that a small brokerage house has, Mr. Silkworth explained, and those using the change's service must conform to the same standards as those set for

FINANCIAL NOTES

Bond offerings last week were \$32,302,000, including \$13,052,000 state and municipal. The Amoskeag Manufacturing Company had 11,000 at work at the end of last week.

A dollar buys 57,000.000 rubles in Mos-cow. The market closed Saturday at 45,000,000.

November exports from the United States are valued at \$383,000,000, \$90,000,000 greater than in November, 1921.

The Federal Sugar Refining Company estimates Cuba's new sugar crop at 4,-102,857 tons. The last crop was 3,996,189 tons.

An advance of \$6 a dozen in the wholesale price of men's hats is expected due to an increase in the price of hatters furs.

A total deficit for 1923 of 721,000,000,000 marks is indicated by the extraordinary budget adopted by the German federal

Frank S. Off, proprietor of the Grand Hotel, Atlantic City, has purchased the Brighton Hotel, on the Boardwalk. The price is said to have been \$3,025,000.

A new German reparations plan may be submitted to French, British, and Italian experts in Paris, Dec. 28, and will be ready for the premiers' conference, Jan. 2. The Hamburg-American and North German Lloyd lines are calling all of their loans, amounting to about 100,000.000 marks, for redemption April 1 at 100

The New York Stock Exchange firm of A. A. Housman & Co. after Jan. 1 will accept no orders for transactions in stocks of less than 100 shares, except for cash.

The November mill consumption of cotton at 577,561 bales was the largest of any month since July, 1917. Increases are also reported in the production of pig iron, steel, zinc, coke, and leather. Last month's average earnings of factory workers in New York State were 43 cents higher than in October. The average salary was \$26.04 in November, or \$1.72 higher than in November, 1921. Approximately \$1,118,000,000 has been turned into the United States Treasury since Armistice Day from the sales of surplus army and navy supplies. The War Department still has surplus supplies worth \$218,300,000.

The Department of Agriculture esti-mates the beet sugar production this year in the United States at about 691,000 short tons from 5,243,000 short tons of sugar beets, while cane sugar production in Louislana and Texas is about 242,000 short tons.

Wells, Fargo stockholders will meet soon to vote on a reduction of capital stock from \$24,000,000 to \$12,000,000 by lowering par value of the shares from \$100 to \$50. It is rumored the directors plan to make a distribution in cash of capital assets of the company equal to \$50 a share.

Eour of the largest held agreed to the company equal to \$50 as share.

550 a share.

Four of the largest bolt and nut man-Four of the largest bolt and nut manufacturing companies in the United States have merged. The companies are: Bayonne Bolt & Nut Company of New York, Standard Bolt Corporation, Michigan, Bolt & Nut Works of Detroit and Boss Nut Company of Chicago. The new company is known as the American Bolt Corporation, capital \$5,000,000 preferred and \$5,000 shares of no par common.

PETROLEUM CONCERN'S LOSS PETROLEUM CONCERN'S LOSS
BERLIN, Dec. 26—The International Petroleum Company (not International Petroleum Company (not International Petroleum Company (not International Petroleum Company of Canada) has a loss of 80,000,000 Swiss francs for 1922 because of operations in countries with depreciated exchange. It therefore abandons control of the German Erdoel Company, Rumania Petroleum Company of Dabrowa, and the Tzechian Liebig Company. Hereafter it will control only two profit-yielding Argentenean companies and the Mexican San Cristobal Oil Company, which recently began producing gasoline.

CANADIAN TRADE IN STEADY STRIDE AT YEAR'S CLOSE

Money Fairly Plentiful Due to Huge Crop-Paper Industry Prosperous

OTTAWA, Dec. 26 (Special)—The year is closing in a very satisfactory trade period, much better, indeed, than that of 1921, and much better for business than could have been confidently expected 12 months ago. Considerable distance yet will have to be traversed there are few countries where conditions generally are as good as in

Canada For this a few outstanding reasons merit attention. The first of these is that Canada is producing the products that the world most needs. The second is that she has been blest with un-usually good crops this year. Thirdly, nations, which buys freely of certain of her products and from which she is able to draw an abundance of capi-

American Capital of Help

Despite her wealth of natural resources, Canada could not have revived as well as she has done industrially and commercially were it not for the fact that she has been able to draw from the United States large amounts of money. It is hardly an exaggeration to say that, for all purposes, capital has been coming into this country during the past year at the rate of nearly \$25,000,000 a

It is well known that the strike in the United States threw quite a little traffic to Canadian lines; but it is not realized the extent to which, through it and other causes, the latter have during the last season. Add to this other American traffic routed through this country and the aggregate is large. The indications are that this volume of business will, if anything,

Foreign Trade Growing

That the United States is getting her share of the new business resulting from Canada's increased buying power is evident from the November trade returns, which show imports from the United States of \$52,422,000, or \$9.-500,000 more than those for October and \$8,000,000 more than those for the corresponding month last year. wants, the exports for the month would have reached \$60,000,000. month imports from the United States

were four times those from Britain.

Exports to Britain in November of about \$72,000,000 were nearly double those to the United States, the explanation being found in the ship-ments of wheat amounting to 44,000,-

000 bushels.

November was a good month in pulp and paper, the total value of these exports having been \$12,076,000, or approximately \$2,000,000 more than that for the corresponding month last year. Of this the United States took \$10,362,000, which shows the growing importance of this trade, The increase in the demand for news print is to be seen in the circumstance that the exports last month were 1,890,000 hundredweights or 550,000 more than those for November, 1920 The exports of wood pulp were also

greater, having been 1,731,801 hun-dredweights as compared with 1,557,-Grain Shipments Break Record

The Dominion Bureau of Statistics' last year.

504,000 bushels of standard grains, or 21,000,000 more than the former peak

Vice-President D. C. Coleman of the Canadian Pacific railway points out that Winnipeg has become the most important grain market in the world. the inspections there for the three mouths ending November, having been 108,231,000 bushels, as compared with 46,000,000 at Minneapolis and 8,275,000

TRENTON, N. J., Dec. 26—The Public Service Railway Company has filed an amended charter in the office of secretary of State, creating \$25,000,000 of 7 per cent cumulative preferred stock and a like amount of 8 per cent cumulative preferred stock in place of the \$50,000,000 of 8 per cent stock previously authorized.

PACKER HIDES QUIET CHICAGO, Dec. 6—Packer hides are quiet and unchanged. Tanners are interested in buff weights, country hides, and bids of 12½ cents a pound are refused for "free" grab. Some dealers are successful in obtaining 13 cents.

GOOD TONE IS DISPLAYED BY STOCK MARKET

Transactions Embrace a Wide List of Securities—Few Weak Spots

Stock prices continued their upward A course on resumption of trading on An the New York stock exchange today Ar after a three-day holiday. The de-mand embraced a wide list with the best gains having been registered in the copper, equipment, steel, oil and An coal-carrying railroad shares.

coal-carrying railroad snares.

Gains of 1 to 2 points were registered by Utah Copper, Piggly Wiggly, Studebaker, Public Service of Am New Jersey, Virginia Carolina Chem-Am Transcontinental Oil. ical preferred. Transcontinental Oil. Baldwin and Reading. Substantial Baldwin and Reading. Substantial Am fractional gains also were recorded Am by American Smelting, U. S. Alcohol, Am by American Smelting, U. S. Alcohol, Am New York Central, Cruicible Steel, Am Pan American and Pacific oils.

Pan American and Pacific oils.

There were a few weak spots, the most conspicuous of which was the 2-point drop in Maxwell Motors A. California Petroleum and General Electric also were reactionary.

Foreign exchanges opened steady with little business being transacted because of the business holiday in

Sentiment Improves

Evidence of increasing confidence in investment and speculative quarters was furnished by the decided upward Aus movement of prices during the morning, which was accelerated by heavy accumulation of strong pools. New high records for the year were established by Stromberg Carburetor, Studebaker, Stewart-Warner Speedometer, Pond Creek Coal, Endicott Johnson, and Standard Oil of New Beth Jersey new stock, the gains ranging from 114 to 314 points. from 11/4 to 31/2 points.

Some of the other strong spots were Standard Oil of California, Producers BR Standard Oil of California, Wells Brow & Refiners, Pullman, Baldwin, Wells Brow Fargo, Piggly Wiggly, Otis Elevator, Burn Burn S. Alcohol, all up 2 to 3 points. and U. S. Alcohol, all up 2 to 3 points. Most of the rails were inactive but

ical declined to 761/2, off 2 points from Friday's close and 6 points below last week's high. Selling was due to disappointment because of the declaration of a regular dividend, some traders having looked for an increase. There are 2.170,000 shares common and a \$6 dividend would call for more than \$13,000,000 annually. There are 389,000 shares preferred. It is said that, while earnings for 1922 were satisfactory they did not justify a \$6 rate at this time and this is probably the reason for an unchanged dividend. Semet Solvay Barrett and General Chemicals, subsidiaries of Allied Chemical, showed improved earnings

fusing. United States Government securities made the best showing as a group, the gains ranging from 2 to \$\%\$ cents on \$100.

In the foreign list Mexican 4s and 5s and Japanese 4s moved to higher ground, while Soissons 6s, Cuba Railground, while Soissons 6s, Cuba Rail-road 5s and Cuba Republic 41/2s of 1942 were reactionary.

NEW YORK COTTON (Reported by Henry Hents & Co., Boston) (Quotations to 2:15 p. m.)

COLOMBIAN ROAD'S AFFAIRS
LONDON, Dec. 25—The Colombian
National Railways will pass into the
hands of the Government, and a meeting
of stockholders has been called for Friday to authorize the transfer. The total
debts now total f1.543,000, an increase in
the year of f114,968. The corporation is
privately owned, with a capital of f593,000, of which the Government holds £307,-

BALL TEAM LEAVES MANILA

MANILA, Dec. 25 (By The Associated Press)—A baseball team composed of National and American League stars defeated a picked team of Manila Americans here today, 12 to 5. The visitors, who came here after touring Japan, departed tonight on the steamer President Jefferson for the United States via Hongakong and Shanghai. Gov.-Geh. Leonard Wood was at the pier and bade the players Godspeed.

with a flying head and hip lock. The second fall came in favor of Gardini BRITISH FOOTBALL in just 12m., by a head lock and back

cepted a pass in a dangerous Seattle by the referee, knowing of no other rush near his own goal line. He manner in which to define it. Lobmayer was aggressive and kept the Pole on the move at all times. Zbyszko had considerable of a weight advan-tage to contend against, but won by alty to Foyston, Mackay broke through his superior knowledge of wrestling alone and added the second goal.

Frank Judson was far too clever for John Prindle from Indiana and the Harvard University coach downed the We western boy, in 9m. 10s., with a head of scissors and bar arm.

YALE IS GIVEN WATER POLO CUPS
NEW HAVEN, Conn., Dec. 26—As an incentive to bring out candidates for the Yale water polo team, George Wilshire of this city has donated six cups to be awarded to the members of the memb Hotel Sherman Square on Friday. A. Link. Columbia '05, has the management of the tournament and Julius Finn and H. Helms will act as referees.

The personnel of the four teams, lists of which have been filed with Manager Link, were announced as follows:

follows:

Columbia — M. A. Schapiro '23; Orrin Frink Jr., '23, Lester Samuels '24 and E. G. Worden '23; alternates, Morris Monsky '25 and W. R. Thompson '23.

Harvard—A. H. King '24, W. T. Pattison '23, R. C. Spaulding '26 and Adrien Gambet '25; alternates, Kilby Smith '25 and Godfrey Dewey 2 G. Ed.

Yale—B. B. Murdock '23, A. C. Mohr '26, Henry Lanier '25 and R. E. Miller '23, alternates; A. G. Lanier '25, F. Bradley '26 and F. M. Crounse '25 S.

Princeton—C. C. Fisher '24, C. T. Smith '22, C. E. Koetter '23, and L. D. Schimpff '26; alternates, A. J. Duncan '25 and E. Capps Jr. '24.

ENGLAND'S SMALLEST COURSE LONDON, Dec. 8 (Correspondence of A. P.)—The smallest golf course in England has recently been opened in the center of a London suburb. It has an area of 1½ acres. The course has been laid out on the side of the fill, so that there are many steep slopes and, despite the limited space, golfers may indulge in every stroke of the game.

EDUCATIONAL

The Schools Provided for Natives and Young Frenchmen in Morocco was readily accepted by the London County Council. The English students

RANCE, in her direction of public the interests of the colonists. The purpose was, first, to give to the young the colonists. Frenchmen—sons of functionaries, officers, colonists, tradesmen and industrialists-the same instruction as they would be given in France in primary and secondary schools and, second, to help in the intellectual and moral elevation of the native populagiving them an instruction which, while not running against their beliefs and customs, would enable the young Moroccans to become welleducated tradespeople and artisans.

The number of schools in Morocco has increased each year since the French protectorate was established in 1916. The French schools have increased from 61 to 87; the Franco-Arabian schools from 53 to 63, and the Franco-Israelite or Israelite from 26 to 42. The pupils increased from 14,834 in 1916, to 25,159 in 1921.

Among the many problems which were posed when the protectorate was established, the school problem was not the least important. The popula-tion composed of European Mussulman, and Jewish elements required plans and programs of education specially studied. M. Roger Lechesnet gives in Excelsior some interesting particulars about educational matters in Morocco.

Before 1912 there existed in Morocco only a few French schools established in the ports, subsidized by the French legation at Tangiers, to which could be added certain Israelite schools created in the populous quarters-the mellahs-of the chief towns and subsidized by the Universal

The secondary teaching is given in four colleges and lycées at Rabat, Oujda, Casablanca and Tangiers—towns in which can also be found colleges for girls. All the primary schools reserve an important place to professional and technical teaching. Casablanca possesses an industrial

and commercial school. For the natives there are first the Mussulman schools where the elements of French arithmetic, and manual work are taught. Above these elementary schools there are two Mussulman colleges at Fez and at Rabat, created with a view to giving a more extended instruction and culture to the young Mussulmans who intend to go in for big commerce and to take up the political, judiciary and administrative functions of the maghzen. The studies in these colleges last four years and comprise the teaching of Arab, French, mathematics, history, geography, object lessons, and Koranic Law. At the end of the four years the pupils go through an examination to obtain the Diplôme de Fin d'Etudes Secondaires.

Still higher studies are undertaken at the Institut of Rabat. There the Moroccan students can develop their knowledge of the French language, and Moroccan history and geography. There are lessons of Arabian language and literature, of Berber dialects, and furidical questions and for those who

wish to enter the corps of Contrôleurs

M. Hardy, who directs in Morocco RANCE, in her direction of public public instruction and beaux arts, endeavors to direct the natives toward to come into close contact with agriculture by training young men the native circles while safeguarding able to conduct horticultural and

There are 18 rural schools, and agricultural lessons are given in the superior Franco-Arabian schools of Rabat and Fez. Then the young natives receive a practical teaching in the gardens of Meknès and in the nursery garden of Sefsou.

Natives are received in experimental farms at Fez and Casablanca while young Frenchmen who have been trained in the Instituts Agronomiques of the metropolis there find the necessary initiation to social and agricultural circles of Morocco before they

tion, which was made during the war, by the Society for the Propagation of Foreign Languages in France, and write their letters in English and the French students write in French. The advantage by no means ends with the receipt by each of letters written in a foreign language. French students are visiting England and English students are visiting France; a stimulus is given to each to learn the language of the other; relationship between the young people of the two countries is established on the friendliest terms; and, as one of the reports from the dents are brought into touch with France as a living country and with French as a living language." Efforts taken by Ober-Stadtschulrat Paulsen, are made to establish the link between students of the same class (Then evening institutes puts it,"English stustudents of the same class. Thus, English girl typists are put into correspondence with French girl typists, tion owing to the work he did in Hamteachers with teachers, clerks with burg as a school reformer. Germany's Propitious Change in School Methods

Berlin, Germany Special Correspondence THE child has a right to a happy school life, and the adult has no right to harass the child with heavy tasks and to haunt him with examinations. The school must not be a place for drudgery work nor a place that interferes with the life that is natural to the The school is justified only when it is a part of the world in which the child loves to live and act. The child should enjoy his mental awakening and find a pleasure in searching,

head of public instruction in Berlin. Mr. Paulsen was called to his post by the majority of the Berlin popula-Paulsen was questioned as follows:
"Is there still much opposition from

"Yes, because they look upon the

of knowledge into the child, but where the child's thinking capacities and his manual faculties are de-

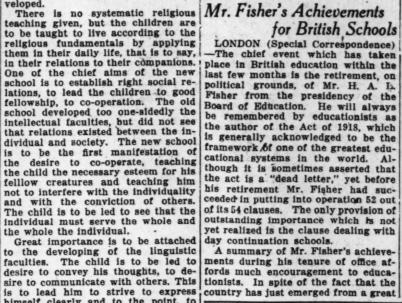

religious fundamentals by applying them in their daily life, that is to say, in their relations to their companions. One of the chief aims of the new school is to establish right social reschool is to establish right social re-lations, to lead the children to good fellowship, to co-operation. The old school developed too one-sidedly the intellectual faculties, but did not see that relations existed between the in-dividual and society. The new school is to be the first manifestation of the desire to co-operate, teaching the child the necessary esteem for his felllow creatures and teaching him not to interfere with the individuality and with the conviction of others. The child is to be led to see that the individual must serve the whole and

desire to convey his thoughts, to desire to communicate with others. This is to lead him to strive to express himself clearly and to the point, to express himself with tact and with taste. The children will not be forced to learn poetry by heart but they are to learn to love it and to desire to recite. Great importance is also attached to developing the appreciation of music. As to the teaching of drawing, mechanics, needlework, etc., the chief attention is given not to mechanical imitation work, but to form the taste and to encourage the desire for individual invention. In mathematics the child is to be brought into living contact with space and numbers and Mr. Paulsen feels sure, that the result will be that in the upper forms there will not be so many pupils that abhor mathematics and

are unable to grasp it.

The great aim of the new school is culture, the development of the intel-lect and the heart. The mistake of the past has been that though they decidedly trained the intellect, they turned out more mechanical beings than humans. In these times of great distress Germany must get a stream of new life from the heart of the people. There must be an awakening to the necessity for true education and the parents must go hand in hand

with the school. I asked if the parents show real interest. Mr. Paulsen said that he found great willingness. One of his appeals was answered by so many letters of approval from parents, teachers, and young people that he that purpose. For one thing, we have the permission of the Ministry to Of course, since the revolution the

nents during his tenure of office af- The gratitude of education fords much encouragement to educa-tionists. In spite of the fact that the country has just emerged from a great | English priversities.

in the main, as follows:

The school should not merely be a place for instruction, but a field of activity where the child can fully satisfy his desires for suitable occupation. The first years of school life are to be spent in so-called "foundation schools," where there is no outlined systematic teaching, no grinding of knowledge into the child in the sense of our dark of ou never succeed in building up the new ondary education has been largely in-creased; and the number of children society, and neither the new school.'

doubled.

Former service men to the number for British Schools of 27,000 have been educated with LONDON (Special Correspondence)

—The chief event which has taken place in British education within the last few months is the retirement, on political grounds, of Mr. H. A. L. Fisher from the presidency of the Board of Education. He will always be remembered by educationists as the author of the Act of 1918, which is generally acknowledged to be the basis in the matter of salaries and basis in the matter of salaries and framework of one of the greatest educational systems in the world. Although it is sometimes asserted that the act is a "dead letter," yet before his retirement Mr. Fisher had succeeded in putting into operation 52 out of its 54 clauses. The only provision of outstanding importance which is not yet realized is the clause dealing with day continuation schools. which he had failed to achieve was the reform of the University of London.

cades ago, knew with absolute cer- which govern all air navigation. tainty that no airplane would ever the limiting maximum speed of fly and that it was the folly to waste racing airplanes is solely dependent

the guesses of an earlier year as to taken as eight, and if the same asthe probable accomplishment within sumptions regarding the combination a specified period were not being nul-

Prediction as a Guide

Despite the partial futility of specfact of a virtual certainty that one's speculations will fall wide of the mark, the attempt is nevertheless of some use. The making of estimates of what performance will be two or ten or forty years from now at least gives a mark at which to aim and it affords a little guidance to those whose affairs are likely to be modified by the development of the aeronauti-Even a poor prediction is better than none.

Manifestly a clear look into the futreated as was the past under the and pilot and with a single support-three headings of speed, altitude, and duration. Most of the important func-Such a machine could hardly be extions to which the aircraft are turned, pected to show the efficiency ratios especially in the domain of commerce, already specified. found to depend primarily on one of these elements of performance or on combinations among them. We for subsequent treatment.

Unlimited Speeds Talked Of

It has long been the delight of prophets and of inventors whose san-guineness has outpaced their discretion of speech to talk of speeds in-creasing without limit, of speeds of 400, 600, and 800 miles an hour and even more. The burden of proof is always on the man who says that a thing is impossible, for much which was supposedly impossible has had a way of being realized in engineering science, but at least it can be definitely stated that such speeds as those just mentioned are not in present prospect and cannot be realized with airplanes approaching the present type, and even if they could it would be impractical to make use of them for commercial purposes. The exposition of the reasons for this statement requires a little arithmetic. An airplane flying 240 miles per hour, only a little higher than the best speed reached by Lieut. Maughan at Detroit, has a propeller thrust of about one and a quarter pounds for every horsepower of the engine. That is the only force available to drive the airplane and there is no conceivable way in which it can be increased more than a few per cent. Indeed, if the propeller were 100 per cent efficient, with no power losses at one and six-tenths pounds per horsepower. To secure more than that would be to get more power out than is put in and would effectively be pernetual motion.

At the present time, high-speed airplanes fly very inefficiently at maximum speed as the necessary result of designing for a moderate land-ing speed. This handicap can only be overcome as suggested in this column several weeks ago, by provision of means of varying the area of the wings or otherwise modifying the lift during flights. We may suppose, however, that such means will be invented and applied and that by refining the design of the airplane to the utmost by withdrawing the wheels into the body and otherwise suppressing every possible ounce of resistance, the total resistance in flight at Private Bath \$2.00 to \$3.00. maximum speed will be reduced to one eighth of the weight. It is very difficult to conceive of a greater advance than this with an airplane in any way resembling those used at present, and even this is dependent upon engineering advances which will not be made without great diffi-culty and long research. Supposing it to be done, however, the maximum weight that the airplane will be able to carry a 240 m. p. h. will be eight times one and one-quarter, or ten a horsepower. In a commercial airplane, at least 75 per cent of this would have to go into the power plant, the airplane structure, the fuel, and the weight of the crew, leaving only 25 per cent, or two and one-half pounds a horsepower, available for paying load. To operate with so low a load ratio as that is obviously uneconomical.

For Commercial Purposes

If the speed were raised to 300 miles per hour the total load which could be carried on the same assump-tions of the maximum reasonable advance in design and invention would be eight pounds a horsepower and the pay load not over one and three-quarters, while for 400 miles the pay load would be cut to cartainly not more than one pound a horsepower. These figures are absolute maxima, and they hold good for all altitudes and for all conditions of flight. It may be remarked, however, that one proaching the conditions set forth under which the airplane will be able to operate at maximum efficiency and maximum speed simultaneously, is by operation at a very high altitude. A heavily loaded airplane equipped with a supercharger gains speed steadily

Airplane Speeds of the Future

HE history of the making of predictions as to the future of aero
miles per hour or even a little more nautical development is coexten-sive with the history of flying itself. regular transport. To talk of doubling Indeed it goes much farther back, for that speed in commercial operation we may fairly include among such with airplanes or helicopters or airpredictions the vehement asservera-ships, however, is only possible for tions of all those who, scarce two de-those without knowledge of the facts

one's time in seeking to emulate the on the point to which the weight car-birds. The making of forecasts has advanced to a stage beyond the point of total denial of a possibility of flight, but there has never been a time when of maximum efficiency with maximum speed be continued, the limiting speed would rise to 480 miles per hour, with a total weight of five pounds per horsepower. This is about the lowulating as to what will be done in the est power loading that has yet been fact of a virtual certainty that one's realized, but of course it may be improved on in years to come. It is nevertheless very difficult to believe in the probability of such speeds as that just mentioned, even with the lightening of structural weights to which we may look forward, as an airplane doing 480 miles an hour at its point of maximum efficiency, even at great altitudes, would be of the most fantastic proportions. Taking as an illustration the engine with which the Pulitzer Trophy was won and which developed 400 horsepower, Manifestly a clear look into the latter to gain our point of view. History and prophecy are successive stages of and prophecy are successive stages of the world be required for a speed which would be required f the same process and the present of 480 miles an hour at maximum efficiency and a 20,000-foot altitude would be only nine square feet. In two distinct sequences. The histori-cal perspective was given in last week's article, and the future may be just large enough to house an engine

On the whole, it seems perfectly safe to say that we shall not see the attainment of a speed in excess of shall confine ourselves for the present 325 miles per hour within the next 10 to speed, leaving altitude and duration for subsequent treatment. fundamentals on which the operation of aircraft now rests.

Classified Advertisements---United States

REAL ESTATE

FOR SALE A-No. 1 Apple Orchard, Stock Co. A-No. 1 Apple Orchard, Stock Co. Capitalized \$50,000, fully paid in.
Situated in the beautiful Spokane Valley, at East Farms, Wash. ideal climate, on practically three railroads, and only about fifteen miles east from the city of Spokane. Property is in first-class condition consisting of one hundred acres, with over seven thousand trees, with irrigating ditch and laterals: covering the orchard. About equally planted to the most salable varieties, Jonathans, Rome Beauty and Wagner brands. Trees now about twelve years old and in full bearing. Crop this year (1922) over 25,000 packed boxes of extra fancy, fancy and choice grades. Property is fully equipped with tractor, power sprayer, and all necessary tools. House and barn on the property, also six-inch driven well and pump for household purposes. About \$60,000 has been expended on the property. Motive for disposing of this valuable property, due to the fact that 80 acres, for 80 per cent of the stock is owned by parties in the East, who are tied down closely with varied interests, and find that they cannot give the proposition the necessary time and attention, as it is becoming a large busiand attention, as it is becoming a large business enterprise in itself. 80% of the stock now held by Eastern people can be purchased upon favorable terms if sold at once. Part cash payment to reliable parties. Property and character of men selling will bear closest scrutiny. Comprehensive details gladly furnished. This advertisement may not appear again, cut it out.

America Again May See the Ripened Art of Eleonora Duse

In courteous statement lurks the im
ing for Eleonora Duse. "You must see her," he advises, on one of her infrequent appearances. "She is a great artist. But do not judge her altogether by what she does today."

In courteous statement lurks the im
ing for Eleonora Duse. "You must northern cities with Ibsen and Praga. Welcomed in Florence, Mantua, Milan has been denied the promised appearance. Yvette Guilbert and her husband have long sought to induce Duse to visit America. Recent report says ing. The D'Annunzio plays appear to they have succeeded. Rumor declares vears of self-imposed exile, is not the Duse who flamed round the world in "La Giaconda," "La Citta Morta," as the Magda who swept back to her leading to the seen again as the stricken diagonal as the stricken against the venture. "You are too old for New York although you might still go in the provinces" her counselve to have said—a bowlderized French version of the rumor it appears impossible to credit. Paula crushed less by the weight of the past than by the conventionality It is to be hoped that she will Duse who first visited America nearly of the reesent.

Shielding, kindly, the Italian's words. And unnecessary. The Duse of today needs no protecting cloak of sympathetic public opinion. The physique is more fragile, the hair is whiter, the spirit is that of youth. The voice is as vibrant and the hands as expressive as when she turned from stage in 1908 and sought refuge in the northern mountains of her country.

To watch Duse appearing today be fore Italian audiences is to see the same simplification of art of which Bernard Shaw wrote years ago in his famous comparison between the Italian actress and Bernhardt, Finished art is insulting phrase. Even the Relasco automatons may be exactly right in movement, in gesture, in tone of voice. In Duse all the elements are co-ordinated to serve only in illuminating the inner nature of the character. In no player of her age have mentality and emotion been as justly balanced. The authority of her acting is redoubled because it is without assumption. Throughout an evening she holds an audience in the hollow of her hand in the manner-to name an actress who is her antithesis in method-that Mrs. Fiske may when she chooses for a brief and unforgettable moment to merge part and

Her Return to the Stage

Duse's return to the stage was made under the management of Zacconi, now the foremost of Italian tragenual excursions to Paris for a short season of the classics. Retired or passed are many of her native rivals. though Virginia Reiter visits the provinces in revivals of "Madame Sans-Gêne" and "Mamman Colibri." Angelo Music plays at the Nazionale in Rome in his Sicilian dialect comedies. Dinah Galli, a younger actress, has not risen to the fame once thought due. Amleto Novelli appears in pictures together with many of the Italian players, lured from the stage by prospec of more lucrative employment. Duse's field is still her own

For the most part she has contented herself with revivals. Marco Praga's drama, "La Porta Chiusa" ("The Closed Gate") and Ibsen's "The Lady From the Sea" have been the two plays to which she has clung. As Ellida Wangel she repeats her deli-

Her New Part it Duse played a mother whose child was supposed to be passing away.

The wife of a brutal peasant, she silently loved another man, her only pleasure during the day height to state. pleasure during the day being to watch him pass by her window. In desperaher hidden love, to give away the sons with a famous actor, in addition money she possessed, to make an to the school instruction. eternal pilgrimage, not to see the schools meet daily for six to seven

farmer who berated her. A formless and possibly still are, actors of note epilogue disclosed her praying bethemselves. Fencing is compulsory fore an altar in a church, until, worn and dancing is taught in all its out by her grief, she fell senseless. branches, from the tempestuous Hun So ill-received was "Cosa Sia" by the garian dances and the jovial Tyrolian Roman audience in the Teatro Constanzi that Duse appeared but twice in the play and then definitely discarded it—her only attempt to challenge the public with a public wi anguish, always controlled yet never the winter term. The management in

HE Italian has a protective feeling for Eleonora Duse. "You must see her," he advises, on one of her Welcomed in Florence, Mantua, Milan In courteous statement lurks the implication that the Duse, who, at 63, be part of her past. One wonders if has come back to the stage after 13 she will be seen again as the stricken against the venture. "You are too old father's house in defiance, as the Italian—and as Anna of "La Citta For the Duse of today is an actress

But when they appear in a native play in which there are solemn prayers in dusky temples before the burning incense pots, wedding ceremonies with performances of the native dances, receptions before the sultan, and per formances of native shadow or puppet shows—then these dusky ladies with fantastic coffures and wild, but harmonious colors in their sarongs, with rings in their noses, bracelets, and anklets, moving to the deep drum of the jungle music, appear in their proper setting. The performance of a Javanese play full of phantoms and sleight-of-hand is a spectacle that can surprise even the taste of the most jaded cinema or theater devotee.

ment of his evebrows.

"The Dragon" in Toronto

TORONTO, Ont., Dec. 23 (Special Correspondence)—For Christmastide, the management of Hart House Theater selected Lady Gregory's humorous fantasy, "The Dragon," which has the richness and ingenuous quality of a nursery tale, seasoned by a measure of sophisticated wit, so that adults enjoyed it quite as much as youngsters. "The Dragon" is one of Lady Gregory's later pieces and its text is evidence that the author does not take the ancient Irish legends of In shades. Some Singapore Eurasians faery and magic quite so seriously as are practically white, many Malays do her friends, W. B. Yeats and George are of a handsome bronze complexion, Russell. It is an Irish version of a with Hindus here and there as black folk tale common to all lands and

hairs in front of them.

The story presented by the Malay in their verbal music, reflect the indrawn ever toward the wave-beats, a performance simple in its externals, deeply moving and always—to use a much abused word—appealing. Apparently she has abandoned the Paulas and Magdas. In Pinero's study in his Harley Street home hangs a large, autographed portrait of Duse. East and West Meet in Lotus Land

Pliny have all mentioned or described this tree as

"about as large as a pear tree" and of many kinds differing as to fruit. There is one kind that has no

stone and is sweeter than the others. "In the island

of the Lotophagi, called Pharis, it is plentiful." It

T WAS a delightful sixty mile drive toward Lake Michigan and along its eastern shore. The rough sandy road near the great lake took us for the last few miles through a low flat region which,

with its stretches of wild rice, resembles the salt marshes near the sea. We alighted by the roadside near a weather-worn unpainted farmho and followed our guide across a field to the edge of an inland lake—and then Michigan

Before us was a bit of beauty that might have been caught up from the orient and dropped into our occident. Nestling close

to the bank and stretching out over the shallow water to the extent of at least two acres, was a mass of glossy green leaves as large as small umbrellas, and this emerald surface was starred with great white blossoms lifted high above the water—hundreds and hundreds of them and countless

buds besides.

Down from the farmhouse came the daughter to go out in a boat to gather lotus

blossoms for 'us.
"How did they come there?" was our first eager question.

Thirty-two years ago a friend of my grandfather, who had made a trip around the world, brought back some lotus seeds. He said that this back-water of Lake Michigan was like the places where the lotus grew in Egypt and India and he asked my grandfather to drop the seeds there. The seeds did not come up that year nor the next nor the next. Twelve years later the first strange leaves appeared; the next there were a few blossoms; each year since the patch has spread, until now-well, you can see for yourselves.'

No blossoms could be reached from the There was only one tippy boat so we had to be content to stand on the bank and watch the young girl paddle out through the low green forest. In her blue gingham dress, she made an entrancing picture as she paddled from flower to flower through the glossy green. Leaves and flowers were ometimes higher than her head as she sat in the boat. At each especially attractive bloom, she stretched her hand high to grasp it just below the calyx and bend it down to into its heart. If it was perfect, she leaned low over the edge of the boat and plunged her arm deep into the water to bring up the long stem from its anchorage bottom of the lake.

As the girl came to shore and we stretched eager hands for the blossoms, we caught their fragrance. It is a little like that of our white water lily, but with an added fruity odor that baffles identifica-

I had before seen occasional specimens of the lotus, especially cultivated, but these must have grown with the same luxurious freedom as in their own country. The open blossoms which I measured were a generous ten inches in diameter. The petals are of a waxy ivory whiteness, exquisite in texture, form and proportion. The gold stamens surround the seed vessel which even in the flower shows the form so common in Egyptian decorations, the form of the poppy

At the home of my hostess, the flowers were placed in a great Japanese vase on a Japanese carved pedestal which brought them to the eye level. Sun-touched they opened each morning and went silently to sleep with the evening shadows.

Living in daily companionship with the lotus thought swung back to its Egyptian and classic association there to be lost in a confusion of uncertainty and seeming contradictions. All down the ages we hear of lotus eaters content "to drowse the day away in dreamy idleness." Whittier in "The Tent on the Beach" says of the people:

They rested there, escaped a while From cares that wear the life away, To eat the lotus of the Nile And drink the poppies of Cathay.

The Egyptian lotus, the lotus of the Nile, is a common article of food in that country and "They form a common article

says Lafcadio Hearn of Japan. The lotus of the Odyssey is different. Lotus seems to have been a popular name for a large number of unrelated plants. The

Libyan lotus, the lotus of Homer, was a tree resembling our elm, with a fruit like the cherry.

Theodore Roussel

HE etchings of Theodore Roussel are little known except to the discerning collector and connoisseur. His dainty and exquisitely ac-complished plates have something of the personal charm of his retiring and graceful personality A devoted follower of Whistler, he has produced

LABURNUMS AND BATTERSEA. ETCHING BY THEODORE ROUSSEL was on this island that Ulysses was compelled to

bind his men and carry them away by force Nor hostile aught Or savage the Lotophagi devised Against our friends, but offered to their taste The lotus; of which fruit what man soe'er Once tasted, no desire felt he to come With tidings back, or seek his country more, But rather wish'd to feed on lotus still With the Lotophagi, and to renounce All thought of home.

But the herb lotus of antiquity-our lotus-was an aquatic ornamental plant, abundant in Egypt in the plains overflowed by the Nile. Theophrastus describes it exactly:

"The flower is white, the petals are narrow as those of the lily and numerous, as of a very double flower. The size of the capsula is equal to that of the largest poppy head, and it is divided by separa tions in the same manner as the capsula of the ,

The decorative and symbolic story of the lotus is woven into all ornamentation and literature, into various religions from the earliest Egyptian periods through Greek, Roman, and all Oriental times, and still persisting in the modern

No longer can we say that "East is East and West is West and never the twain shall meet," for with the lotus in its "beauty of opening bud and full expanded flower, with its quivering heart of gold held up to the sun," growing in a Michigan lake, "There is neither East nor West." Beauty has brought the two together.

Browning's "Saul"

It was when I first heard "Saul" recited by one who was a true artist, most simply but most perfectly, that my somewhat puzzled awe of Robert Browning changed to a reverent love. must have been such a song as the poet conceives for him that was sung by that very human, very lovable young harper, David, that song which caused such a change in the King's dark mood that, as we are told in the old record, "the evil spirit departed

Read if you do not remember it the wonderful concluding portion of the poem. David has, as it were, sung his very heart out to win the King from his despairing gloom. Then, at last, he feels the pressure of Saul's hand on his head, and . . . casting his harp aside he breaks out into that great confession of faith for himself and his royal master. a faith that has power to move the very mountains of despair, that far outsoars the shadow of earthly night, a faith that "at the difficult minute" a Hand

Snatch Saul, the mistake. Saul the failure, the ruin he seems now,—and bid him awake From the dream, the probation the prelude to find

himself set Clear and safe in new light and new life,—a new harmony yet.

FLORENCE TYLER, in "The Poetry Review.

plates of the riverside so much beloved of that master. The reproduction above is an example of the unique point of view from which he approaches a hackneyed enough, and revivifies it with a quality all his own.

Mr. Roussel has devoted much energy in recent years to the perfection of a method of printing in colors from metal plates. He has succeeded in producing some very fine work in this medium. It is a laborious, complex, and exact technique, and Roussel persuades the copper to render tones and qualt-ties altogether surpassing anything known to the old English color-printers. His painting is also of great distinction, possessing a quiet, calm grandeur, placing him among the "aristocrats of the brush."

Beauty Endures

Some sing the pomps of chivalry • As legends of the ancient time. Where gold and pearls and mystery Are shadows painted for sublime:

But passions of sublimity Belong to plain and simpler things. And David underneath a tree Sought, when a shepherd, Salem's springs,

Where moss did into cushions spring, Forming a seat of velvet hue A small unnoticed trifling thing To all but heaven's hailing dew

And David's crown hath passed away Yet poesy breathes his shepherd skill, His palace lost—and to this day The little moss is blossoming still.

Success

A very young painter, who afterward became great, stood in his obscure and struggling days, when no one had heard his name or would look at his pictures, before the greatest canvas of the greatest painter of the time. The grandeur of the work, alike in conception and execution, staggered him. Possibly there was despair at his heart as he asked himself how could he too poor for proper opportunity for study, too poor even to afford a model, or to buy oils, ever hope to emulate such a masterpiece as this. But there was at his heart no meanness, no envy, no disposition to belittle or to grudge the other his high place. Throwing back his head, with flashing eyes and a throb in his voice, he exclaimed radiantly, "And I, too, am an artist!"-

Something Singing

Tis not in the high stars alone, Nor in the cup of budding flowers. Nor in the redbreast's mellow tone. Nor in the bow that smiles in showers. But in the mud and scum of things

There alway, alway something sings

-JOHN CLARK

On Doing God's Will

T SEEMS fair to assume that not all who repeat the Lord's Prayer do so with a definite effort to understand its meaning. Having accepted

it as a part of the daily routine, too often it is repeated without an adequate understanding of its deep significance. How many who pray, "Thy will done," really understand the purport of their petition, and are truly desirous of substituting God's will for their own desires? It seems likely that the number is not large, except among those who have come to know what God's will really is, and the futility of exercising one's own will, unless it be in conformity with God's design for His perfect likeness, man.

Human will has long been looked upon by many as something to be cherished and strengthened, as something worthy to dominate and control one's desires and activities; and "a strong will" has been in the main regarded as a favorable personal characteristic. The student of the Bible, however, can scarcely fail to be impressed with the numerous instances where Jesus was ready to submit his wish and desire to the Father's will regarding him, even though that submission should lead along the rugged way from Gethsemane to Calvary. In his hour of great stress, he prayed that his cup of bitter experience might pass from him; yet, he could immediately thereafter utter that expression of complete selfabnegation: "Nevertheless not as I will, but as thou wilt." What perfect surrender of self! What complete submission to the control of divine Principle; and what a glorious outcome of the unparalleled self-immolation manifested in his subsequent glorified experience!

A great boon conferred upon mankind, through the teachings of Christian Science, has been the clarification of the mental condition termed human will, together with an understanding of the necessity of overcoming it, and definite directions as to the accomplishment of this desirable result. On page 144 of "Science and Health with Key to the Scriptures" Mrs. Eddy says, "Human will belongs to the so-called material senses, and its use is to be condemned;' and she further adds, in the same paragraph: 'Human will-power may infringe the rights of man. It produces evil continually, and is not a factor in the realism of being." Moreover, Mrs. Eddy emphatically states that the effects of exercising socalled will-power to heal the sick can only result

in a condition worse than the first for the person seeking relief.

But, one may ask, why may healing by will-power not be beneficial? Christian Science clearly teaches that human will belongs solely to the mortal or carnal mind, which possesses no healing properties; hence, cannot be utilized with beneficial results. That is to say, since disease and discord of whatever type are the results of false thinking, they can be healed only by the correction of erroneous thought. The carnal or mortal mind possesses no corrective power in itself, since it consists only of materialistic thoughts. Consequently, its use would scarcely improve the spiritual status of the patient, but would rather strengthen him in his material beliefs. Furthermore, it is learned in Christian Science that since God is all-inclusive good, and besides Him there is no reality, the divine Mind alone heals. That is to say, God alone exercises true healing power. Moreover, God, divine Mind, is the creator of the spiritual universe of divine ideas-with no element of discord or disease-which He rules in perfect harmony. Submission to divine will, then, is the recognition of God's government of His universe and obedience to His law. This is the subordination of the human will to the divine, the earnest of the supplication, "Thy will be done."

To live in the constant desire to do God's will is to endeavor to conform one's thought to the perfect ideas which constitute spiritual consciousness. It necessitates the surrender of all desire to promote selfish interests; for when it is learned that God's will toward men includes only good, that no good is outside of divine consciousness, and that God's will is manifested in the activity of that consciousness, the futility appears of striving to maintain one's own desires or wishes, except so far as they conform to God's wish for man. The doing of God's will is, then, the bringing of the kingdom into human experience, the manifestation of God's reign on earth, "as it is in heaven." It is self-surrender, the laving down of mere human desires for the reign of harmony, the government by God, who is divine Love. Mrs. Eddy says in phrase both terse and apt, "Truth, and not corporeal will, is the divine power which says to disease, 'Peace, be still'" (Science and Health, p. 144). God's will is done, and mankind in truly reflecting and expressing His attributes thus manifests

Faire la Volonté de Dieu

Traduction de l'article anglais de Science Chrétienne paraissant sur cette page

L EST juste de supposer que ceux qui répètent l'Oraison Dominicale ne s'efforcent pas tous à en comprendre le sens. L'ayant considérée comme faisant partie de la routine journalière, on la répète trop souvent sans avoir une compréhension suffisante de sa signification profonde. Combien y en a-t-il de ceux qui prient: "Ta volonté soit faite," qui comprennent réellement la portée de cette requête et aspirent vraiment à substituer la volonté de Dieu à leurs propres désirs? Il est probable qu'on n'en compte pas un grand nombre, à moins que ce ne soit parmi ceux qui en sont arrivés à savoir quelle est réellement la volonté de Dieu et la futilité d'exercer leur propre volonté autrement que conformément aux desseins de Dieu en faveur de Sa ressemblance parfaite, l'homme

La volonté humaine a pendant longtemps été considérée par bien des gens comme quelque chose qu'il faut chérir et sultiver, comme quelque chose qui est digne de dominer et de gouverner nos désirs et nos activités; et en général "une forte volonté" a été regardée comme étant une caractéristique personnelle favorable. Cenendant, ceux qui étudient la Bible ne sauraient guère faire autrement que d'être impressionnés par les nombreux cas où Jésus était disposé à soumettre ses souhaits et ses désirs à la volonté de son Père à son sujet, alors même que cette soumission allait le mener le long du chemin raboteux de Gethsémané jusqu'au Calvaire. A l'heure de la grande détresse, il pria, demandant que sa coupe d'expérience amère passât loin de lui; cependant, aussitôt après, il put prononcer cette expression d'abnégation complète: "Toutefois, non pas ce que je veux, mais ce que tu veux." Quel renoncement absolu à soi-même! Quelle soumission complète au gouvernement du Principe divin; et combien admirable fut le résultat de l'incomparable immolation de lui-même-manifestée lors de son expérience glorifiée subsequente!

Un grand bienfait que les enseignements de la Science Chrétienne ont apporté à l'humanité, c'est l'explication de l'état mental appelé volonté humaine ainsi que la compréhension de la nécessité de la vaincre et les indications définies pour accomplir ce résultat désirable. A la page 144 de "Science et Santé avec la Clef des Ecritures" Mrs. Eddy dit: "La volonté humaine appartient aux soi-disant sens matériels, et il faut en condamner l'usage;" et puis elle ajoute, dans le même paragraphe: "Le vouloir humain peut enfreindre les droits de l'homme. Il produit continuellement le mal, et n'est pas un facteur dans le réalisme de l'être." De plus, Mrs. Eddy dit formellement que les effets de la soi-disant force de volonté exercée sur les malades dans le but de les guérir ne peuvent aboutir qu'à produire chez la personne qui cherche du soulagement un état pire que le premier.

Mais, dira-t-on peut-être, pourquoi la guérison par le pouvoir de la volonté ne serait-elle pas avantageuse? La Science Chrétienne enseigne clairement que la volonté humaine n'appartient qu'à l'entendement mortel, c'est-à-dire à l'esprit charnel. qui ne possède aucune propriété curative; donc on n'obtiendra aucun bon résultat en s'en servant. C'est-à-dire, puisque la maladie et l'inharmonie, de quelque nature qu'elles soient, sont la conséquence du penser erroné, elles ne sauraient être guéries que par la modification de la pensée erronée. L'esprit charnel ou entendement mortel ne possède en luimême aucun pouvoir capable d'apporter des rectifications, vu qu'il n'est composé que de pensées matérialistes. Par conséquent, l'emploi qu'on en ferait n'améliererait guère l'état spirituel du malade. mais il accentuerait plutôt ses croyances matérielles. On apprend aussi dans la Science Chrétienne que puisque Dieu renferme tout bien, et qu'en dehors de Lai il n'y a aucune réalité, seul l'Entendement divin guérit. C'est-à-dire, Dieu seul exerce le véritable pouvoir guérisseur. De plus, Dieu, l'Entende ment divin, est le créateur de l'univers spirituel des idées divines, qui n'a aucun élément d'inharmonie ni de malade, et il gouverne en parfaite harmonie. La soumiss:on à la volonté divine est la reconnaissance du fait que Dieu gouverne Son univers; elle est donc l'oi éissance à Sa lòi. C'est la subordination de la volonté humaine à la divine, la sincérité de la supplication: "Ta volonté soit faite."

Vivre avec le désir constant de faire la volonté. de Dieu, c'est s'efforcer de conformer sa pensée aux idées parfaites qui constituent la conscience spiritu-Cela nécessite le renoncement à tout désir de l'avoriser des intérêts égoïstes: car lorsqu'on

apprend que la volonté de Dieu envers les nommes ne renferme que le bien, qu'aucun bien n'est en dehors de la conscience divine, et que la volonté de Dieu se manifeste en tant qu'activité de cette conscience, on voit la futilité de lutter pour maintenir ses propres désirs ou souhaits, si ce n'est lorsqu'ils sont conformes au souhait de Dieu en faveur de l'homme. L'accomplissement de la volonté de Dieu est donc l'établissement du royaume dans l'expérience humaine, la manifestation du règne de Dieu sur la terre, "comme au ciel." C'est le renoncement à soi-même, c'est l'abandon des désirs purement humains pour le règne de l'harmonie, le gouverne-ment de Dieu, qui est l'Amour divin. Mrs. Eddy dit en termes à la fois concis et justes: "La Vérité, et non la volonté corporelle, est le pouvoir divin qui dit à la maladie: 'Tais-toi, sois tranquille'" (Science et Santé, p. 144). La volonté de Dieu est faite, et c'est en reflétant et en exprimant véritablement Ses attributs que le genre humain manifeste les qualités

Moving Among the Stars

The poetry of motion is a phrase much in use, and to enjoy the epic form of that gratification it is necessary to stand on a hill at a small hour of the night, and, having first expanded with a sense of difference from the mass of civilized mankind, who are horizontal and disregardful of all such proceedings at this time, long and quietly watch your stately progress through the stars. After such a nocturnal reconnoitre among these astral clusters, aloft from the customary haunts of thought and vision, some men may feel raised to a capability for eternity at

THE apparent irritation manifested by the American Secretary of State because of sometimes wild specula-

The Mysteries of State

tions indulged in by certain newspaper correspondents relative to possible diplomatic action by the United States has a certain amount of justification. Yet the evil of which Secretary Hughes complains would not exist if there were a franker attitude assumed at the State Department toward the people in general as represented by the

press. If there were more light in the Department, there would be less excuse for heat on the part of the Secretary. Prominent European diplomatists, now stationed at Washington, are quite outspoken in their declarations that not in any chancellery of Europe is there such impenetrable secrecy as in the American Department of State. The air of mystery, which repels even accredited diplomatists, of course multiplies the difficulties of the task confronting correspondents who are anxious to inform their papers of any action that may be in contemplation. Unable to obtain satisfaction in the State Department, directly, they seek it from other sources, and get by devious ways something which has, at any rate, a plausible air of being correct. Neither the process nor the result is to be commended, but the fault has not rested entirely upon the news-gatherers.

It would seem to be unfortunate if the old methods of secret diplomacy, which the representatives of the United States so strongly condemned at Versailles should find their most glaring illustration today in the American Department of State. It stands to reason that the diplomacy which is secret at home, where a multitude of observers and inquirers are seeking information, will be doubly so abroad, where treaties are being negotiated by diplomatists largely shielded from public observation. Much of the criticism of the American attitude toward the problems of the Near East, for example, might have been averted had there been a frank expression by the State Department of what were its limitations and what its purposes. The gratification generally expressed at the stand taken by the American observers at Lausanne indicated that, had their program been made public earlier, much criticism which the Department has declared to have been embarrassing would have been

The State Department is, of course, the last intrenchment of bureaucracy. Its inertia is indomitable. To reform the methods which have grown up in almost a century of dignified activity is no light task. Any Secretary of State who will attempt this reform, who will throw open the doors to the purifying light of day, clean off the barnacles and give the State Department the qualities of a smoothly functioning governmental machine, will deserve well, not only of the American Nation but of other nations doing business with it.

THE movement in Canada to organize a Civil Service Reform League is the next practical step to protect the

Canadian Civil Serviće Reform gains made in recent years for the merit system. After persistent effort in Parliament and much educational work outside, big strides have been made toward eliminating political patronage from the Canadian Civil Service. The Civil Service Commission has been strengthened and, while there is still room for improvement, it may

fairly be claimed that Canada has lately moved forward

into the vanguard of progress in Civil Service reform. At the time of the election of the last parliament, in 1917, Sir Robert Borden, leader of the war Government, spoke of the need of a wise and bold policy of constructive reform. He said that the system of patronage in the distribution of contracts and offices had been the root of many political evils. When for many years distribution of patronage had been confined to the party in power there had been a natural disposition to adjust the balance when at length the other party succeeded to office. Once committed to the system influences were recognized and interests created that were not easily resisted or dislodged. However, the resolution had been taken to abolish trading in patronage, to fill public office by merit and not by favoritism, and to establish honest and open competition in awarding contracts and buying supplies.

The Civil Service Act of 1918 established the merit system. It provided for classification and reorganization of all Government departments and extended the power of the Civil Service Commission to cover all appointments and promotions in the Government service. The task of reclassification of the Service as a preliminary step to administration of the new act has been accomplished.

The Civil Service is itself becoming more aware of the benefits through reorganization. One useful service that the proposed Civil Service Reform League could perform would be to let the public know more about this gain. In one department alone for example, it is stated that reorganization has effected a saving of approximately \$600,000 annually.

In a service of about 60,000 persons, especially in a rapidly growing country like Canada, changes in organization become necessary every few years, and numerous resignations, promotions, and new appointments are constantly demanding attention. In the general work of administrating the act to maintain appointments and promotions on the basis of the merit system, the Civil Service Commission is entitled to public support. An enlightened public interest is indeed constantly necessary. It is realized that the Civil Service Reform League in the United States has rendered signal service to the country. Useful work awaits such an organization in Canada.

THE European hubbub of the last few weeks—whatever it has accomplished constructively for Europe—has

served to divert world attention from a careful scrutiny of developments in the Far East. If—as students of world affairs would have us believe—the next great crisis in human history is to arise in the Orient, these developments, for the historian, are of no less significance than recent events in Europe. Early

recent events in Europe. Early
in 1920, Soviet Russia, it will
be recalled, made a series of alluring offers to the Chinese
Government. These included the granting of every
demand which China—in justice, by the way—had made
upon nations enjoying special privileges within her
borders, i.e., renunciation of spheres of interest withdrawal of troops and police, withdrawal of post offices,
abolition of consular jurisdiction, relinquishment of the
leased territories, restoration of the foreign concession

and settlements, and complete tariff autonomy.

Despite its craftiness China ignored this appeal.

While other nations—notably the United States—were refusing to do business with the soviets, China did not wish to act alone in entering into agreements of so comprehensive a character with so doubtful a Government.

During the last two years, however, the situation has altered. Not that, at the present time, the Chinese are more sympathetic to the social and economic doctrines of the soviets than in 1920. The very elements in Russia which brought about the revolution and the subsequent establishment of Bolshevism are lacking in China. But during the last two years the Soviet Government has apparently strengthened its position at home, has been invited to sit at the international conference table, and has entered into commercial agreements with Western powers. At the present time China is being driven to closer relations with Russia by the demands of national self-interest

There are many ties of common interest uniting the two countries. For 3000 miles they have a common boundary line. Parts of Siberia are dependent upon Manchurian grain, and Russia, generally, has relied for her meat supply upon Mongolia. Large quantities of timber, furs, and skins are imported into China from Siberia every year. The first commercial treaty which China enacted with any nation was that with Russia in 1689, and since then her relations with the Russians have been closer than with any other people of the Occident—save, during the past 23 years, with the American.

The present situation facing China is just this. Russia has a fair-sized army in Mongolia and along the Manchurian frontier. With the defeat of the various White armies the Soviet has become the dominant power in Siberia. Russia means business—business with a threat. The first and most important item on the program is a reassertion of Russian interest in the Chinese Eastern Railway, which, in the absence of Chinese power, has been usurped by the Japanese.

Manchuria, in fact, is destined to be the empire in which the complex questions of Russo-Sino-Japanese relationships will be settled. The fear which is driving China toward a re-establishment of friendlier relations with Russia is that of a Russo-Japanese alliance, having as its purpose the joint exploitation of China's resources in Manchuria. It is not at all inconceivable that Japan might trade her interests in north Saghalin Island to the Soviet in exchange for certain interests, perhaps in the Chinese Eastern Railroad. Such a division of spoils, in fact, would find much favor among certain elements in langer

It is to forestall such a move that China is looking with favor upon the advances being made by the Soviet mission in Peking. Whatever the outcome may be the future balance of world power is certain to be influenced by the alignments now evolving in the Far East.

Those who look about from the pinnacle of achievement, whether that attainment be one of intellectuality,

Is There an Intellectual Aristocracy? wealth, genius, or temporal power, are inclined to believe, and to impart the belief, that it is through the processes and methods which they have adopted and applied that the great problems of the world may best be solved. The observer is persuaded to believe that as there is an aristocracy of wealth, an aristocracy of genius, and an

artistocracy of power, so also there is an aristocracy of intellect, or of intellectuality, of the intelligentsia, as those of the class are sometimes referred to. He is led to believe that all endeavor, unless directed and supervised by those of one or another of the classes regarded as aristocratic, is futile and foreordained to failure.

At the moment, when a solution is being sought for the problems which perplex the people of the world, the reassuring invitation is extended to refer these problems to those comprising what President Hopkins of Dartmouth College designates as an "aristocracy of brains." This aristocracy, he is quoted as saying, will lead the world out of the dilemma that now oppresses it.

Is it true, as asserted, that to the intelligentsia belongs the credit for the overthrow of the serf system in Russia? Was it an "aristocracy of intellect" that brought about the French Revolution? Did the intellectuals, as a class or as an aristocracy, accomplish the abolition of slavery in the United States? It is undoubtedly true, as President Hopkins asserts; that the serfs did not rise up of themselves and throw off the yoke of oppression, and likewise that the Negroes of the slave states did not bring about their own emancipation. The masses of France also were aided in their crusade by those who claimed to compose the "aristocracy of intellect."

And yet the term "aristocracy of intellect" is somewhat distasteful to those who are not regarded among the elect as having attained the intellectual status of aristocrats. Americans prefer to appraise themselves by some other standard. They shrink from a classification whose

name smacks so strongly of something incongruous to a free democracy. They seem inclined to believe that if there is an aristocracy of intellect there may one day be set up an autocracy of intellect, with the limiting or inclusive lines fixed according to a standard indicated, not by intelligence, but by intellectuality.

This evident determination to make democracy, as it is understood in its broadest sense, the basis, rather than some undetermined and fluctuating standard of intellectuality, may reasonably be defended, because it is, in fact, impossible to free such a standard from the dangers which are inherent in any aristocracy. The tendency of the class always is to contract, rather than to extend, its inclusive or limiting lines. Education, the ability to think aright, real intelligence, may sooner or later be displaced as the qualifying standards, and the willingness to think according to a formula be substituted.

Education is imperative. Of this there can be no doubt. But this means that education must be of the masses, not of the classes. It has not been made apparent that the colleges have acquired proficiency in turning out supermen or superwomen. Neither does it appear that those who might, if they chose, lay claim to such distinction of class as is suggested by the president of Dartmouth, have been foremost in solving humanity's great problems. It must be that in the future, as in the past, the really great accomplishments must be by those who have learned to see and think clearly. Among such there can be set up no aristocracy, either of intellectuality or of wealth.

INCREASING interest in the subject of state parks, designed to supplement the somewhat more pretentious

The Need of

State Park

Systems

Theater

Ticket

Speculating

national parks in the United States, indicates a wholesome appreciation of the need of available recreation places removed from the cities and free from that commercialism which is becoming more and more persistent and offensive. It has been proposed, and the plan does not appear to be an extravagant one, that park systems be so devised

that any person, trayeling by automobile, might be able to camp in a national or state park every night, and that state parks be provided within easy access of everybody. Modern methods of transportation have made such a plan feasible. The tendency on the part of the public to avail itself of the opportunities already offered encourages a comprehensive movement to extend and increase available state park areas.

In some of the states there has been worked out and established a definite and ambitious park system. Massachusetts, New York, Ohio, Illinois, and some of the older states of the middle west already have many splendid natural parks, in some cases combined into connected systems reached by auto highways, trolley lines or railway trains.

It is encouraging also to note the fact that precautions are urged against commercialism and profiteering in the parks and playgrounds. All supplies, it is proposed, shall be furnished under the direction of the park commissioners, and not through the medium of concessionnaires. The need is that these open places be made and kept popular. They should be as easy of access as one's back yard, and as free from disagreeable influences as the home. There is room for many such parks in America.

THE recent announcement from the offices of the New York Producing Managers Association regarding

their plan for stamping out the theater ticket speculation evil is not very reassuring. The establishing of twenty offices or bureaux, distributed over Greater New York, where tickets for all of the theaters may be purchased for the price of the ticket plus 10 per cent or even 10 cents on each ticket, service charge, is not doing the great favor that

those whose sponsor the plan would have the public believe, particularly as the plan includes the selling of stock in the new ticket bureau business enterprise (only members of the producing managers' association or the theaters in which the attractions are being played will be allowed to purchase stock in the new syndicate).

The "service" to the public is couched in terms of such keen commercialism that the theatergoer will not only not be helped by the plan proposed, but will be even worse off than at present, as the men who have conducted legitimate theater ticket libraries for many years are likely to be heard from, and under the proposed plan ticket speculation by those who are technically known among their own people as the "scavengers" is sure to increase

Here was an opportunity for the Producing Managers Association to put itself on record as doing a noble thing; they could have won the long-suffering public, which would have been particularly advantageous at this time, in view of the fact that they, the managers, have announced their intention of promoting a plan for the establishing of The American National Theater.

That ticket bureaux selling tickets for many different theaters should be located in different parts of the city, for the clearing of the congestion at theater box offices and saving the time of patrons who would, otherwise, go from theater to theater, looking for seats, no one questions. That they should be owned and managed by those most concerned, owners of the theaters, is also clear; but they should be conducted as a sensible, well-advised and much-needed accommodation for both the manager and his patrons, establishing better mutual feeling and respect—which is in itself sound business policy—and for the elimination of the ticket speculator, who has brought nothing but shame to the theater.

The Producing Managers Association will be fathering a worthy enterprise if it establishes these bureaux and maintains them strictly on a non-profiteering basis. Editorial Notes

OF MORE than slight moment is the meeting of the committee of about 100 representative men and women, headed by Elihu Root, which is planned for Jan. 16 next to discuss the questions: "How far and in what manner should the United States participate in international affairs?" and "How far is it wise at this time to reduce the American army and navy?" The purpose of the committee, which has been named by Alton B. Parker, as president of the National Civic Federation, is to arouse public interest in and encourage study of international matters among all classes of citizens. It is, moreover, believed that such a body, drawn from the leaders of opinion in many different callings and sections, may find avenues of approach to the public consciousness more effective than anything yet attempted, The need for an organized agency, through which from time to time the American point of view may be declared, has been recognized for some time, and many believe that through this committee it may be possible not only to furnish original and authoritative material to aid in forming a sound public opinion, but also, by an exposition of facts, to counteract the propaganda and special pleading for subversive causes which are not only prevalent but a source of confusion and danger today. Success to so worthy an effort!

ALTHOUGH the Rev. Dr. Jowett, at a meeting in Queen's Hall, recently, expatiated somewhat thrillingly on the condition of affairs in New York which faced him when he first landed in that city to take up a pastorate there, it is difficult for the ordinary American fully to credit what he declared to have been his experiences, From the general nature of Dr. Jowett's remarks, the average listener would believe that the United States was a country in which every third person on the street spoke a different language. That this is scarcely the truth Dr. Jowett must have discovered if he lived any length of time in America, for in that country there are plenty of Joneses and Smiths and Robinsons and Macs, even though he found the absence of such names so disconcerting when he was handed first the church roll of membership. Of course there are colonies of foreigners in New York and in the other great cities of America, but so there are in London and Manchester. If the average Englishman will meet the average American as his cousin in deed and in truth, he will find very slight differences in character underlying the surface.

ALTHOUGH M. Bérard, the French Minister of Public Instruction, does not hold out any hopes that actual building will be begun for some months on the accommodations for groups of foreign students in connection with the "University City," the residential quarter for students of the University of Paris, yet the very fact that such a project has been initiated is replete with promise. The City of Paris has set aside for the students of the university more than twenty acres of the ground occupied by the old fortifications. Of this area, the buildings for French students will occupy nearly four acres. Requests for accommodation have already been made for Canadian and English students, and the university is also in communication with organizations in China, Japan, and the South American republics in regard to the accommodation for their students. Every movement making for a wider interest among the youth of the nations is helping on the time when peace shall be

A NOTABLE act of international courtesy was the gift by Georges Clemenceau of a gold medal, previously presented to him by the city of Mulhouse, Alsace, to the American Ambassador to France the other day for transmission to the United States as a token of his deep appreciation of the cordial attitude of the people of America during his recent visit to that country. The medal, by the way, was struck in 1898 to commemorate the centenary of the voluntary union of the free city of Mulhouse with France, and M. Clemenceau desired his gift to be taken as a tribute to the American soldiers who later "so splendidly helped in freeing Alsace." Whether or not one agrees with the "Tiger's" motives and aims, this act must be reckoned as one distinctly worthy of recognition

MAYHAP it was a rash promise which Prof. Elmer S. Riggs, a Chicago palæontologist, made just prior to sailing to Patagonia on a fossil-hunting expedition, regarding reports that a plesiosaurus was wandering about in the territory of Chubut, Argentina. Said the professor: "If I meet that plesiosaurus, I'll put a lariat around his neck and lead him direct to the Buenos Aires zoo." Should the professor meet the beast face to face, however, far more probably—with apologies to the "Ingoldsby Legends"—"heedless of grammar, he'll cry out, "That's him!" Then, though he may get to the zoo ahead of the beast, there probably won't be any rope around its neck.

THE decision of the Russell Sage Foundation to start a survey next month by three or more "experts" to determine the mental status of New Hampshire folks suggests a question of truly far-reaching import: Who is to test the mental status of the experts? Perchance it is impertinent to hint at such a possibility, but facts are stubborn things sometimes, and it may do the experts no harm to know that many people think that such psychologists as they need a mental test far more than does the average citizen of an unoffending community.

IN HIS statement regarding the photographs taken during the recent eclipse of the sun in Australia, to test the Einstein theory, Dr. W. W. Campbell, director of the Lick Observatory on Mt. Hamilton, Cal., showed he had the right idea concerning progressive investigation. "Scientific men," he declared, "do not care one way or the other regarding the findings. We only want to know the truth"
